

Obesity *Facts*

The European Journal of Obesity

OBESITY FACTS proudly celebrates the publication of its 5th volume in 2012! The journal has firmly established itself as an important scientific publication dealing with all areas of obesity research (Impact Factor 1.144).

Under the growing influence of the internet, the reception of the journal has gradually shifted to the digital environment via net-based systems. This has led to our decision to publish OBESITY FACTS as an **online-only** journal as of 2012.

Supplements such as congress abstracts or special issues will be still available as print issues on request.

You may wish to subscribe to the free issue alert at www.karger.com/alerts to ensure you always know when a new issue goes online.
