

## Contents

### Volume 1 Systemic Anatomy, Body Wall, Upper and Lower Limbs

Preface to the 6th Edition • Preface to the 5th Edition • Information for Users

#### Systemic Anatomy

Parts, skeleton, regions and axes of the body • Body types • Motor system • Skin • Cardiovascular system • Lymphatic and organ systems • Surface projections of thoracic and abdominal viscera • Central and peripheral nervous system

#### Body Wall

Vertebral column and vertebrae • Thorax and ribs • Joints and ligaments of the vertebral column and the sternum • Surface relief of the back • Muscles of the back • Vessels and nerves of the back and the back of the neck • Surface relief of the thorax and abdomen • Muscles of the ventral body wall and inguinal region • Diaphragm • Breast and axilla • Vessels and nerves of the ventral body wall

#### Upper Limb

Bones of the shoulder girdle and upper limb • Joints of the shoulder girdle and upper limb • Surface relief of the upper limb • Muscles of the shoulder and arm • Muscles of the forearm • Muscles of the hand • Synovial sheaths of the hand • Brachial plexus and innervation of the upper limb • Blood vessels and nerves of the shoulder, the axilla and the arm • Sections and tomograms of the arm • Blood vessels and nerves of the forearm • Sections and tomograms of the forearm • Blood vessels and nerves of the hand • Sections and tomograms of the hand • Paralysis of nerves of the upper limb

#### Lower Limb

Bones of the pelvis and lower limb • Joints of the pelvis and lower limb • Surface relief of the lower limb • Muscles of the pelvis and thigh • Muscles of the leg • Muscles of the foot • Lumbosacral plexus and innervation of the lower limb • Veins and lymph vessels of the lower limb • Blood vessels and nerves of the thigh and gluteal region • Sections and tomograms of the thigh • Blood vessels and nerves of the leg • Sections and tomograms of the leg • Blood vessels and nerves of the foot • Paralysis of nerves of the lower limb

#### Indexes of Eponyms

Alphabetical index of common used eponyms • Alphabetical index of anatomical terms with corresponding eponyms

#### Subject Index

### Volume 2 Head and Neck, Thorax, Abdomen, Pelvis, CNS, Eye, Ear

Preface to the 6th Edition • Preface to the 5th Edition • Information for Users

#### Head and Neck

Skull • Bones of the skull • Temporomandibular joint and hyoid bone • Muscles of the scalp and face • Cervical fascia and spreading of inflammation in the neck • Muscles of the neck • Oral cavity • Teeth and facial skeleton • Deciduous dentition • Salivary glands and tonsils • Tongue • Pharynx • External nose and nasal cavity • Sections and tomograms of the face • Larynx • Thyroid gland • Sections and tomograms of the neck • Blood vessels of the head and neck • Lymph vessels and lymph nodes of the head and neck • Cutaneous innervation of the head and neck • Nerves and blood vessels of the face • Nerves and blood vessels of the neck • Peripharyngeal space

#### Thoracic Viscera

Mediastinum and thymus • Esophagus • Trachea and bronchi • Lungs, bronchial tree and bronchopulmonary segments • Aortic arch and its branches • Pulmonary arteries and bronchial tree • Pericardial sac • Heart and large blood vessels • Sections and tomograms of the heart • Inner cavities and valves of the heart • Conducting system of the heart and myocardium • Projection of the heart and mitral stenosis • Arteries and veins of the heart • Thoracic organs • Sections and tomograms of the thoracic organs • Large blood vessels and lymph vessels in the mediastinum • Autonomic nervous system in the thorax and neck

#### Abdominal and Pelvic Viscera

Peritoneal cavity • Surface projections of abdominal viscera • Stomach, small intestine, colon and rectum • Liver, segmentation of the liver, gall bladder and bile duct system • Pancreas and spleen • Viscera of the upper and lower abdomen • Blood vessels and lymph nodes in the abdominal region • Large intestine and posterior abdominal wall • Kidneys, suprarenal glands, renal pelvis and ureter • Great blood vessels in the retroperitoneal space • Sections and tomograms of the abdominal viscera • Lumbosacral plexus • Great blood vessels in the lower retroperitoneal space and pelvis • Male and female pelvis with urogenital organs and blood vessels • Blood vessels and nerves of the rectum • Connective tissue of the lesser pelvis • Autonomic nervous system in the retroperitoneal space • Autonomic nervous system in the lesser pelvis • Sections and tomograms of the female and male pelvis

#### Pelvic Floor and External Genitalia

Pelvic floor • External genitals of a female • Testis and epididymis • Spermatic cord and inguinal region of a male • External genitals of a male • Blood vessels and nerves of the perineal region

#### Central Nervous System

Spinal cord, spinal meninges and blood vessels of the vertebral canal • Cranial meninges and blood vessels of the cranial meninges and the brain • Brain, brain stem and cerebellum • Brain • Cranial nerves • Ventricles of the brain and subarachnoid space • Fornix, hippocampus and limbic system • Choroid plexuses • Thalamus, hypothalamus and mid brain • Nuclei of the forebrain and internal capsule • Cerebellorubral connections • Visual pathway • Sections and tomograms of the brain

#### Visual Organ and Orbital Cavity

Eye, lacrimal apparatus and eyelids • Orbital cavity • Extra-ocular muscles • Eyeball • Contents and topography of the orbital cavity • Sections and tomograms of the orbital cavity

#### Vestibulocochlear Organ

External ear and tympanic membrane • Middle ear with mastoid air cells, tympanic cavity, facial nerve canal, auditory tube and auditory ossicles • Bony and membranous labyrinth with the inner ear • Sections and tomograms of the petrous part of the temporal bone

#### Indexes of Eponyms

Alphabetical index of common used eponyms • Alphabetical index of anatomical terms with corresponding eponyms

#### Subject Index

## Order Form

#### Please send:

— copy/ies: **Set (Volume 1 + 2)**  
CHF 150.– / USD 136.50  
ISBN 3–8055–7669–2

— copy/ies: **Volume 1**  
CHF 90.– / USD 82.00  
ISBN 3–8055–7667–6

— copy/ies: **Volume 2**  
CHF 90.– / USD 82.00  
ISBN 3–8055–7668–4

'This is an outstanding atlas of  
human anatomy which will  
accompany medical students for  
the duration of their studies,  
whatever their field of interest or  
specialization. Clinicians in practice  
should consider adding this atlas to  
their personal library or, at a  
minimum, to the department's  
collection.'

Canadian Journal of Anesthesia

'... an excellent atlas with a rich  
and updated iconography, which  
can be recommended to every  
medical student.'

Surgical and Radiologic Anatomy

The 6th edition of **Wolf-Heidegger's Atlas of Human Anatomy** has been further revised, expanded and updated by Professor Petra Köpf-Maier. A well-established classic, the atlas has been renowned for the high quality of its illustrations since its inception; the more recent editions, however, have also received praise for their didactic structure and clinical approach. All illustrations are in color and are complemented in a highly instructive manner by a generous number of anatomical sections and selected radiological images (ultrasound, CT scans, MRIs). Placing these side by side serves to develop and train the skills needed to interpret these images correctly.

This edition includes the following new features:

- New **clinically relevant illustrations** have been included and are shown within their practical context, ranging from herniated discs and paralysis symptoms to the consequences of a stenosed portal vein.
- The **chapter on head and neck anatomy**, which is of specific interest to dental students, has been enlarged.
- The atlas consistently employs the current **Terminologia Anatomica**.
- Furthermore, the most important **eponyms** are introduced since they form an important part of daily clinical communication.

**Wolf-Heidegger's Atlas of Human Anatomy** has been designed and crafted explicitly for students of human medicine and dentistry in their preclinical and clinical years, but will also appeal to clinical practitioners, who will appreciate the illustrations' superb quality and beauty as well as their continuing relevance to daily practical decision-taking.
