**Fascinating insights into the relationship
between brain disease and creativity**

Neurological Disorders in Famous Artists

Editors:

Julien Bogousslavsky

François Boller

The study of how a neurological disorder can change the artistic activity and behavior of creative people is a largely unexplored field. This publication looks closer at famous painters, writers, composers and philosophers of the 18th to the 20th centuries who suffered from neurological diseases such as stroke, epilepsy, brain trauma and dementia. The diseases of Gershwin, Kant, Musorgsky, Poe, Ravel, Van Gogh and many more are diagnosed in retrospect and treatment options according to modern medical technologies are discussed.

Presenting fascinating insights into the relationship between brain disease and creativity in famous minds, this publication is highly recommended to neurologists, psychiatrists, physicians as well as to everybody interested in art, music and literature.

New book series:

Frontiers of Neurology and Neuroscience

formerly 'Monographs in Clinical Neuroscience'

Series Editor:

J. Bogousslavsky (Lausanne)

Focusing on topics in the fields of both Neurosciences and Neurology, this new series (formerly 'Monographs in Clinical Neuroscience') provides current and unique information in basic and clinical advances on the nervous system and its disorders.

Further titles are currently in preparation:

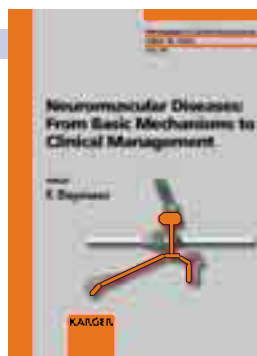

- Handbook on Cerebral Artery Dissection
- Handbook on Neurovascular Ultrasound
- Non-Convulsive Status Epilepticus in Clinical Practice
