

Contents

- Preface: **Kiess, W.; Chernausek, S.D.; Hokken-Koelega, A.C.S.**
- Children Born Small for Gestational Age: Definitions and Etiology: **Wollmann, H.A.**
- Diagnosis and Management of in utero Growth Failure: **Odibo, A.O.; Sadovsky, Y.**
- Fetal Growth Restriction and the Developmental Origins of Adult Disease Hypothesis: Experimental Studies and Biological Consequences: **Krechowec, S.O.; Thompson, N.M.; Breier, B.H.**
- Molecular Genetic Disorders of Fetal Growth: **Chernausek, S.D.**
- Birth Weight and Later Risk of Type 2 Diabetes: **Harder, T.; Schellong, K.; Rodekamp, E.; Dudenhausen, J.W.; Plagemann, A.**
- Low Birth Weight and Optimal Fetal Development: A Global Perspective: **Franko, K.L.; Gluckman, P.D.; Law, C.M.; Beedle, A.S.; Morton, S.M.B.**
- Insulin-Like Growth Factor/Growth Hormone Axis in Intrauterine Growth and Its Role in Intrauterine Growth Retardation: **Kiess, W.; Kratzsch, J.; Knüpfer, M.; Robel-Tillig, E.; Pulzer, F.; Pfaeffle, R.**
- Clinical Management of Small-for-Gestational-Age Babies: **Knüpfer, M.**
- Management of Short Stature in Small-for-Gestational-Age Children: **Dahlgren, J.**
- Puberty and Adrenarche in Small-for-Gestational-Age Children: **Hokken-Koelega, A.C.S.**
- Neurological and Intellectual Consequences of Being Born Small for Gestational Age: **Tuvemo, T.; Lundgren, E.M.**
- Low Birth Weight in Developing Countries: **Qadir, M.; Bhutta, Z.A.**

A frequent medical
problem with long-term
consequences

Small for Gestational Age Causes and Consequences

Editors

Wieland Kiess
Steven D. Chernausek
Anita C.S. Hokken-Koelega

Intrauterine growth restriction in the human, the origin of many serious medical, ethical, socioeconomic and humanitarian issues, still needs in-depth studies.

The current volume presents the latest research results and offers detailed discussions on clinical care. The term small for gestational age (SGA) is defined and manifestations of prenatal growth retardation and its etiology are described. Special emphasis is placed on the role of genetic defects, in particular in the IGF/GH axis. Besides, not only the immediate consequences for SGA neonates and their clinical care are examined, but also possible sequelae in childhood. A study of utmost importance considers the neurological and intellectual consequences for SGA children. It is further revealed that fetal growth restriction can adversely affect health well into adulthood, and increase the risk for type 2 diabetes. Finally, interesting insights into the causes and consequences of low birth weight in developing countries are provided.

This publication is a must for pediatricians, neonatologists, obstetricians and endocrinologists, as well as anyone interested in embryology, genetics, diabetes, clinical nutrition, molecular biology and neuroendocrinology.

Fields of Interest:

*Pediatrics; Obstetrics; Embryology,
Fetal Medicine, Neonatology, Endocrinology,
Genetics, Clinical Nutrition, Molecular Biology,
Neuroendocrinology, Diabetes*

KARGER

The Book Series

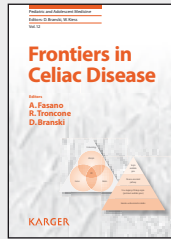

*A problem-oriented series
aimed at both the
general practitioner and the
hospital physician*

Pediatric and Adolescent Medicine

Series Editors:
Kiess, W. (Leipzig);
Branski, D. (Jerusalem)
ISSN 1017-5989

This series deals with rapidly evolving pediatric subspecialties such as perinatal medicine, pediatric endocrinology, immunology, neurology and cardiology. The individual volumes not only highlight recent advances in a particular area, but also provide a comprehensive overview of new trends in monitoring child development and subsequent adult health. The series aims to inform both the general practitioner and the hospital physician about current theoretical and practical developments in pediatric and adolescent medicine.
