

# Lyme Borreliosis

## Biological and Clinical Aspects

### Editors

**D. Lipsker**  
**B. Jaulhac**

Physicians and biologists from different backgrounds have contributed to this volume which provides a unique state-of-the-art approach to all aspects of Lyme borreliosis. From the biology of the transmitting tick to the most up-to-date serologic testing methods, all aspects are discussed.

The first part of the book offers comprehensive and authoritative reviews on Lyme borreliosis and its vector. The second part answers frequently asked questions, for example 'What should one do in case of a tick bite?' or 'How do I manage tick bites and Lyme borreliosis in pregnant women?'

All specialists who are involved in the care of patients with Lyme borreliosis – such as physicians, general practitioners, internists, paediatricians, dermatologists, neurologists, rheumatologists, rehabilitations specialists, microbiologists, and last but not least infectious disease specialists – will find this review, in which all specific aspects of the disease are covered, an outstanding reference text.

*Fields of Interest: Dermatology; Infectious Diseases; Microbiology; Neurology, Pediatrics, Rheumatology, Bacteriology, Parasitology*

A comprehensive and  
up-to-date review  
by leading experts in

# Current Problems in Dermatology

Series Editor: P. Itin (Basel)

ISSN 1421-5721 / e-ISSN 1662-2944

This series presents a selection of new ideas and information in the field of clinical and investigative dermatology. Crossing the borders of skin diseases it explores interdisciplinary strategies, linking dermatology with immunology, allergology and other research areas. Each volume is individually designed to provide an up-to-date presentation of new and interesting topics in dermatology and skin research. The contributing authors are acknowledged experts in their fields. The wide range of topics discussed includes normal and pathological skin conditions, the development of new equipment, drugs and analytical techniques, and recent advances in the treatments that can be offered to patients.
