

- Adaptive immunity 109  
Adenoid 329  
Adenosine-5'-monophosphate 76  
Adhesion molecules 68, 277  
Airway hyperresponsiveness 76  
Allergic rhinitis 76, 258, 268  
Ana o 2 27  
Angiogenesis 294  
Antibody affinity 364  
Antigen mimics 294  
Antiretroviral treatment monitoring 196  
Anti-soy antibody response 58  
*Aspergillus fumigatus* 124  
Asthma 1, 87, 210, 215, 258  
Atopic dermatitis 87, 148, 156, 210, 355  
– eczema/dermatitis syndrome 380  
Atopy 364  
Autoantibodies 98, 210, 268  
Autoimmunity 98, 210  
Azelastine 231
- B cells 329  
Bisphenol A 240  
Blocking antibodies 13  
*Blomia tropicalis* 215  
*Brassica napus* 116
- Caddisfly 141  
Cashew allergen 27  
Cat allergen 1  
Cedar pollen 268  
Celiac disease 98  
Chemokines 109, 277  
Cholera toxin 248  
Chronic urticaria 177  
β-Conglycinin 58  
Corn 322  
Cross-reactivity, allergen 116  
Cry9C 322  
Cyclooxygenase 168  
Cysteinyl leukotrienes 336  
Cytokine production 148  
– secretion 231  
– synthesis 141
- Decoy receptors 109  
Dendritic cells 40  
*Dermatophagoides pteronyssinus* 215  
Diet, polyunsaturated fatty acids 310  
Dietary antigen exposure 248
- DNA chip 355  
Double-blind placebo-controlled food challenge 132  
Dust mite 346
- Ebastine antihistamine 263  
Ebastine/fexofenadine, pharmacodynamic effects 263  
Endocrine disrupter 240  
Eosinophils 48  
Epithelium, nasal 68  
Excretory-secretory products 48
- FcεR1α-specific autoantibody 177  
Fel d 1 1  
Fexofenadine antihistamine 263  
Food allergy 27
- Gene expression 156  
Gliadin 98  
Gluten 98  
Glycinin 58  
Granulocyte-macrophage colony-stimulating factor 48  
Grass pollen 76  
Graves' disease 268
- Hazelnut 132  
Histamine 336  
Histamine-induced skin reactivity 263  
HIV infection 196  
– –, Africa 183  
– –, children 183  
– –, women 183  
– RNA 196  
HLA-DQ2/DQ8 98  
House dust mites 68
- IgA 248  
IgE 13, 248, 322, 336  
IgG 13  
Immunogenicity, oral 58  
Immunotherapy 13, 258, 294  
Indoor environment 1  
Inflammation 87, 109, 148  
Inflammatory disorders 310  
Innate immunity 87  
Inner-city asthma 346  
Interferon gamma 141, 168  
Interleukin-1 109  
Interleukin-2 329  
Interleukin-4 168, 240, 329
- Interleukin-5 141  
Interleukin-6 231  
Interleukin-8 231  
Interleukin-10 40, 373  
Interleukin-13 141, 148, 168  
Intrinsic-type atopic dermatitis 148  
Ionomycin 329
- Kuwait, pollen seasons 258
- Legumin-like protein 27  
Leukotriene 87  
Lipid mediators 310  
Lung fibroblast 168  
Lymphocyte(s) 277, 310, 329  
– transformation test 373
- Mammalian lectin 221  
Mast cell(s) 336  
– – degranulation 221  
Mediator release 221  
Methacholine 76  
Monocytes 310  
MRP8/MRP14 40  
Myofibroblast 168
- NC/Nga mice 355  
Nerve growth factor 380  
Neutrophil migration 221  
Nickel allergy 373  
Nonsteroidal anti-inflammatory drugs 82  
Novel mouse model, experimental asthma 346  
Nuclear receptors 310
- Oilseed rape 116  
Optivar® 231
- p24 antigen 196  
*Paragonimus westermani* 48  
Pediatric allergy 364  
Perennial allergic rhinitis 68  
Peripheral blood monocytes 156  
– – T cells 148  
4β-Phorbol 12-myristate 13-acetate 329  
Plant lectin 221  
Pollen allergens 116  
Pollinosis 268  
Polyunsaturated fatty acids 310  
Profilin 116  
Prostaglandin E<sub>2</sub> 168  
Protease 124

Protein 124  
– Fv 336  
Provocation tests, nasal 68  
Purification techniques, *Aspergillus fumigatus* 124

Real-time quantitative PCR 355  
β-Receptor atopy 210  
Recombinant cockroach 346  
Respiratory allergy 1  
Rhinitis 215  
Rofecoxib 82

Seasonal allergic rhinitis 258  
Seed storage proteins 27

IIS globulin 27  
Signal transduction 310  
sIL2R 177  
Skin prick test 132, 364, 380  
α-Smooth muscle actin 168  
Soy 58, 248  
Sputum 76  
Subcutaneous specific immunotherapy, safety 258  
Substance P 380  
Suckling 380  
Superantigens 336

T cell receptor Vβ17 373  
Th1/Th2 balance 240

Toll-like receptor 87  
Trafficking, T cells 277  
Transcripts 156, 355  
Transglutaminase 98  
Tree nut allergy 27  
Tryptase 177  
Tumor necrosis factor alpha 231

Vasoactive intestinal peptide 380  
Viral load, HIV 196

Wheal-and-flare reactions 263
