This publication presents evidence about the magnitude and severe consequences of comorbidity of mental and physical illnesses from a personal and societal perspective. Leading experts address the huge burden of comorbidity to the affected individual as well as the public health aspects; the costs to society and interaction with factors stemming from the context of socioeconomic developments. The authors discuss the clinical challenge of managing cardiovascular illnesses, cancer, infectious diseases and other physical illness when they occur with a range of mental and behavioral disorders, including substance abuse, eating disorders and anxiety. Also covered are the organization of health services, the training of different categories of health personnel and the multidisciplinary engagement necessary to prevent and manage comorbidity effectively.

The book is essential reading for general practitioners, internists, public health specialists, psychiatrists, cardiologists, oncologists, medical educationalists and other health care professionals.

Contents

Foreword: Goldberg, D.
Preface: Sartorius, N.; Holt, R.I.G.; Maj, M.

Background
• Conceptual Perspectives on the Co-Occurrence of Mental and Physical Disease: Diabetes and Depression as a Model: Fisher, E.B.; Chan, J.C.N.; Kowitt, S.; Nan, H.; Sartorius, N.; Oldenburg, B.
• Public Health Perspectives on the Co-Occurrence of Non-Communicable Diseases and Common Mental Disorders: Oldenburg, B.; O’Neil, A.; Cocker, F.
• Counting All the Costs: The Economic Impact of Comorbidity: McDaid, D.; Park, A.-L.
• Difficulties Facing the Provision of Care for Multimorbidity in Low-Income Countries: Beran, D.

Comorbidity of Mental and Physical Illness: A Selective Review
• Depression, Diabetes and Dementia: Rosenblat, J.D.; Mansur, R.B.; Cha, D.S.; Baskaran, A.; McIntyre, R.S.
• Cardiovascular Disease and Severe Mental Illness: Holt, R.I.G.
• Multiple Comorbidities in People with Eating Disorders: Monteleone, P.; Brambilla, F.
• Anxiety and Related Disorders and Physical Illness: Kariuki-Nyuthe, C.; Stein, D.J.
• Cancer and Mental Illness: Lawrence, D.; Hancock, K.J.; Kisely, S.
• Infectious Diseases and Mental Health: Müller, N.
• Physical Diseases and Addictive Disorders: Associations and Implications: Gordon, A.J.; Conley, J.W.; Gordon, J.M.

Management of Comorbidity of Mental and Physical Illness
• The Role of General Practitioners and Family Physicians in the Management of Multimorbidity: Boeckxstaens, P.; De Maeseneer, J.; De Sutter, A.
• Training Physicians at Undergraduate and Postgraduate Levels about Comorbidity: Cushing, A.; Evans, S.
• The Dialogue on Diabetes and Depression African Nursing Training Programme: A Collaborative Training Initiative to Improve the Recognition and Management of Diabetes and Depression in Sub-Saharan Africa: Millar, H.L.; Cimino, L.; van der Merwe, A.S.
• The Challenge of Developing Person-Centred Services to Manage Comorbid Mental and Physical Illness: Gask, L.
• Prevention of Comorbid Mental and Physical Disorders: Hosman, C.

Concluding Remarks
• Conclusions and Outlook: Sartorius, N.; Holt, R.I.G.; Maj, M.

The easiest way to order: www.karger.com/kismh
Contents

See the journal website for contents
Psychotherapy and Psychosomatics publishes research articles on clinical issues in medicine and psychiatry, with special reference to psychotherapy and psychosomatic research. The Journal features original articles and reviews on current and controversial issues; innovations (both in terms of conceptualization and pilot studies); case management articles (biopsychosocial management in clinical medicine); clinical notes; letters to the editor (both comments on published articles and preliminary research).

Submission
Only papers written in English are considered and should be submitted using the online submission website at:
www.karger.com/pps

Should you experience any problems with your submission, please contact
Giovanni A. Fava, MD
Dipartimento di Psicologia
Università di Bologna
Viale Berti Pichat 5
I–40127 Bologna (Italia)
E-Mail: giovanniandrea.fava@unibo.it

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Psychotherapy and Psychosomatics and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Conflict of Interest
All forms of support and financial involvement (e.g. employment, consultancy, honoraria, stock ownership and options, expert testimony, grants or patents received or pending, royalties) which took place in the previous three years should be listed in the acknowledgement section of the paper, regardless of their potential relevance to the paper. In the cover letter to the editor, the corresponding author should certify that all forms of conflict of interest by all authors were clearly identified in the text. Authors of systematic reviews concerned with therapies are asked to report funding sources and conflicts of interest of the studies that were selected.

Arrangement
Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Abstracts should be no longer than 250 words for regular articles, and no longer than 150 words for clinical notes. They should include the following information: Background: the problem that prompted the study and the purpose of the study; Methods: data sources, subjects, design, measurements, data analysis; Results: most important findings; Conclusions: implications, future directions. Abstracts for Special Articles do not need to be structured. Editorialists, Case Management articles and Letters to the Editor should not have an abstract.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate sheets. Tables require a heading and figures a legend, also prepared on a separate sheet. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 × 223 mm) or provide crop marks. On the back of each illustration, indicate its number, the author’s name, and ‘top’ with a soft pencil. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 800.00 per page.

Data analysis: Adequate description of statistical analysis should be provided, including the types of statistical tests and whether they were one- or two-tailed. Standard deviations, instead of standard errors of the mean, are preferred. All significant results must include the test value, degree(s) of freedom, and probability level.

References: In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples:
(b) Papers published only with DOI numbers: Theodorics TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063585.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any further editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author’s ChoiceTM
Karger’s Author’s ChoiceTM service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.Karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author’s ChoiceTM service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH’s Public Access Policy is available at http://publicaccess.nih.gov/policy.htm

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s ChoiceTM feature, however, are also permitted to archive the final, published version of their article, which includes copyrighting and design improvements as well as citation links.

Page Limitations and Charges
There are no page charges for papers of 7 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 18 manuscript pages (including tables, illustrations and references). Letters commenting on published articles should not exceed 500 words of text plus references. Re-search letters should not exceed 1,000 words of text plus a maximum of 10 references. They may have only one table or figure.

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

Reprints
Orders forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.
Key Issues in Mental Health
(formerly 'Bibliotheca Psychiatrica')

Problems of clinical psychiatry covered in a series that has helped pioneer the development of this field

With its first volume published in 1917, this series has served to chart some of the main developments of contemporary psychiatry. Throughout these years, individual volumes have outlined the specific problems and controversies which have characterized the growth of psychiatry and have reflected a broadening acceptance of its methods and applications. Recent volumes have been distinguished by their bench to bedside coverage of current topics in psychiatry, psychology and neurosciences. Taking a rigorously interdisciplinary as well as translational approach, Key Issues in Mental Health attempts to build bridges to related disciplines in an effort to integrate a variety of aspects relevant to the successful diagnosis and treatment of psychiatric disorders.
The Annual Meeting of the American Psychosomatic Society is an open scientific and clinical forum where investigators from allied disciplines pool their knowledge, consider problems of conceptual relationships, and develop ideas that will stimulate further research. The meeting is devoted to the presentation of scientific papers, symposia, workshops, poster sessions, and invited lectures, and special attention is given to networking opportunities to foster ongoing relationships within the community. Registration will open later this year at www.psychosomatic.org

Confirmed plenary speakers:
John F. Cryan, PhD, University College Cork, Cork, Ireland
on stress and the microbiota-gut-brain axis
Daniel J. Buysse, MD, University of Pittsburgh School of Medicine, Pittsburgh, Pennsylvania
on sleep and health
William Thompson, PhD, Centers for Disease Control and Prevention, Atlanta, Georgia
on health-related quality of life and well-being

Confirmed invited symposia:
★ What is Psychosomatic Medicine in Practice?
★ Transdisciplinary Approaches to Targeted Health Disparities
★ High Utilizers in Psychosomatic Medicine
★ Behavioral Interventions with Racial/Ethnic Minority Populations

Pre-conference workshops:
★ Mini-Medical School: Acute Coronary Syndrome, Stroke and Peripheral Arterial Disease
★ Sleep Assessment Boot Camp
★ Statistics: Missing Data

Meeting Information:
This 3 ½ day meeting will include Plenary Sessions, Paper Sessions, Posters, Roundtables, Mentoring and Student Programs and Special Interest Groups. Registration fees begin at $390 for full registrants and $160 for students, and cover participation in the Opening Session and Welcome Poster Reception on Wednesday and all scientific programming from Thursday through Saturday (breakfast and refreshment breaks are provided).

Contents

Adolescent Brain Development
• The Developmental Mismatch in Structural Brain Maturations during Adolescence: Mills, K.L.; Goddings, A.-L.; Clasen, L.S.; Giedd, J.N.; Blakemore, S.-J.
• Decreases in Energy and Increases in Phase Locking of Event-Related Oscillations to Auditory Stimuli Occur during Adolescence in Human and Rodent Brain: Ehlers, C.L.; Wills, D.N.; Desikan, A.; Phillips, E.; Havstad, J.
• The Role of the Anterior Insula in Adolescent Decision Making: Smith, A.R.; Steinberg, L.; Chein, J.
• Behavior and Neural Correlates of Empathy in Adolescents: Overgaard, S.; Güroğlu, B.; Rieffe, C.; Crone, E.A.
• Teens Impulsively React rather than Retreat from Threat: Dreyfuss, M.; Caudle, K.; Drysdale, A.T.; Johnston, N.E.; Cohen, A.O.; Somerville, L.H.; Galván, A.; Topham, N.; Hare, T.A.; Casey, B.J.
• Feedback Processing in Adolescence: An Event-Related Potential Study of Age and Gender Differences: Grosse-Filh, J.; Migliaccio, R.; Zottoli, T.M.
• The Impact of Puberty and Social Anxiety on Amygdala Activation to Faces in Adolescence: Ferri, J.; Bress J.N.; Eaton N.R.; Proudfit G.H.
• Altered Gene Expression and Spine Density in Nucleus Accumbens of Adolescent and Adult Male Mice Exposed to Emotional and Physical Stress: Warren, B.L.; Sial, O.K.; Alcantara, L.F.; Greenwood, M.A.; Brewer, J.S.; Rozofsky, J.P.; Parise, E.M.; Bolaria-Guzman, C.A.
• Shifts in Hormonal Stress Reactivity during Adolescence Are Not Associated with Changes in Glucocorticoid Receptor Levels in the Brain and Pituitary of Male Rats: Dziiedzic, N.; Ho, A.; Adabi, B.; Foilb, A.R.; Romeo, R.D.
• BDNF Modulates Contextual Fear Learning during Adolescence: Dincheva, I.; Pattwell, S.S.; Tesserollo, L.; Bath, K.G.; Lee, F.S.

Drug Abuse in Adolescence
• The Role of Dopamine D1 and D2 Receptors in Adolescent Methylphenidate Conditioned Place Preference: Sex Differences and Brain-Derived Neurotrophic Factor: Cummins, E.D.; Griffin, S.B.; Duty, C.M.; Peterson, D.J.; Burgess, K.C.; Brown, R.W.
• Dopamine D1+D2 Receptor Heteromer Regulates Signaling Cascades Involved in Addiction: Potential Relevance to Adolescent Drug Susceptibility: Perreault, M.L.; O’Dowd, B.F.; George, S.R.
• Persistent Loss of Hippocampal Neurogenesis and Increased Cell Death following Adolescent, but Not Adult, Chronic Ethanol Exposure: Broadwater, M.A.; Liu, W.; Crews, F.T.; Spear, L.P.
• Physiological Correlates of Neurobehavioral Disinhibition that Relate to Drug Use and Risky Sexual Behavior in Adolescents with Prenatal Substance Exposure: Conradt, E.; Labrador, L.L.; Shankaran, S.; Bada, H.; Bauer, C.R.; Whitaker, T.M.; Hammond, J.A.; Lester, B.M.

Prenatal Drug Exposure
• Structural Brain Imaging in Children and Adolescents following Prenatal Cocaine Exposure: Preliminary Longitudinal Findings: Akyuz, N.; Kekatpure, M.V.; Liu, J.; Sheinkopf, S.J.; Quinn, B.T.; Lala, M.D.; Kennedy, D.; Makris, N.; Lester, B.M.; Kosofsky, B.E.
• Effects of Prenatal Cocaine Exposure on Social Development in Mice: Kabir, Z.D.; Kennedy, B.; Katzman, A.; Lahvis, G.P.; Kosofsky, B.E.
European Addiction Research is a unique international scientific journal for the rapid publication of innovative research covering all aspects of addiction and related disorders. Representing an interdisciplinary forum for the exchange of recent data and expert opinion, it reflects the importance of a comprehensive approach to resolve the problems of substance abuse and addiction in Europe. Coverage ranges from clinical and research advances in the fields of psychiatry, biology, pharmacology and epidemiology to social, and legal implications of policy decisions. The goal is to facilitate open discussion among those interested in the scientific and clinical aspects of prevention, diagnosis and therapy as well as dealing with legal issues. An excellent range of original papers makes European Addiction Research the forum of choice for all.

Selected contributions
• Psychometric Properties of the Cannabis Abuse Screening Test in Hungarian Samples of Adolescents and Young Adults: Gyepesi, Á.; Urbán, R.; Farkas, J. (Budapest); Kraus, L. (Munich/Stockholm); Piontek, D. (Munich); Paksi, B.; Horváth, G.; Magi, A.; Eisinger, A.; Pilling, J.; Kökényei, G.; Kun, B.; Demetrovic, Z. (Budapest)
• Assessment of Problematic Internet Use by the Compulsive Internet Use Scale and the Internet Addiction Test: A Sample of Problematic and Pathological Gamblers: Guertler, D. (Greifswald); Rumpf, H.-J.; Bischof, A. (Luebeck); Kastirke, N. (Greifswald); Petersen, K.U. (Tuebingen); John, U.; Meyer, C. (Greifswald)
• A Bibliometric Analysis of European versus USA Research in the Field of Addiction. Research on Alcohol, Narcotics, Prescription Drug Abuse, Tobacco and Steroids 2001–2011: Bramness, J.G.; Henriksen, B. (Oslo); Person, O. (Umeå); Mann, K. (Mannheim)
• Efficacy and Tolerability of Baclofen in Substance Use Disorders: A Systematic Review: Agabio, R.; Preti, A.; Gessa, G.L. (Cagliari)
• Impaired Error-Monitoring Function in People with Internet Addiction Disorder: An Event-Related fMRI Study: Dong, G. (Jinhua); Shen, Y. (Dalian); Huang, J. (Jinhua); Du, X. (Shanghai)
• Insula-Specific 1H Magnetic Resonance Spectroscopy Reactions in Heavy Smokers under Acute Nicotine Withdrawal and after Oral Nicotine Substitution: Gutzeit, A. (Winterthur/Salzburg); Froehlich, J.M. (Winterthur); Hergan, K. (Salzburg); Graf, N.; Binkert, C.A. (Winterthur); Meier, D.; Brügger, M. (Zurich); Reichsauer, C. (Winterthur); Sutter, R.; Herdener, M. (Zurich); Schubert, T.; Kos, S. (Basel); Grosshans, M. (Mannheim); Straka, M. (Winterthur); Mutschler, J. (Zurich)
• Mental Disorders Associated with Driving under the Influence of Alcohol and/or Drugs: A Register-Based Study: Karjalainen, K.; Lintonen, T. (Tampere/Helsinki); Joukamaa, M. (Tampere); Lillisunde, P. (Helsinki)
• Alcohol Use and Hazardous Drinking among Medical Specialists: Joos, L.; Glazemakers, I. (Wilrijk); Dom, G. (Wilrijk/Boechout)
