Pearls and Pitfalls in Head and Neck Surgery
Practical Tips to Minimize Complications

Editor
Claudio R. Cernea

Associate Editors
Fernando L. Dias, Dan Fliss, Roberto A. Lima
Eugene N. Myers, William I. Wei

In this unique volume, leading international experts share their experiences in the management of head and neck tumors, providing a guidebook for all surgeons dealing with head and neck neoplasms. Each chapter offers a concise description of useful ‘pearls’ and dangerous ‘pitfalls’ which must be avoided. Contributions cover topics from thyroid glands, neck metastases, and oral tumors to laryngeal, pharyngeal, and nasopharyngeal tumors, as well as salivary gland tumors, skull base tumors, and reconstruction surgery. In addition to frequent diseases which are encountered in everyday practice, some new therapeutic topics such as video-assisted thyroidectomy, robotic surgery, and management of the neck after organ preservation treatment are discussed. The 2nd edition has been extended by topical chapters of major practical interest including the latest findings and techniques. The new chapters are clearly indicated and can be recognized easily. Head and neck surgeons, otolaryngologists, neurosurgeons, maxillofacial surgeons, plastic surgeons, radiation and clinical oncologists, and general surgeons, as well as students and residents interested in the management of head and neck tumors, will find this publication an indispensable manual.

Contents
- Thyroid and Parathyroid Glands
- Neck Metastases
- Oral/Oropharyngeal Tumors
- Laryngeal Tumors
- Hypopharyngeal Cancer
- Nasopharyngeal Cancer
- Salivary Gland Tumors
- Skull Base Tumors
- Vascular Tumors
- Parapharyngeal Space Tumors
- Infections of Head and Neck
- Tracheostomy
- Reconstruction
- Miscellaneous

General Information

Subscription Rates: Subscriptions run for a full calendar year. Prices are given per year.

Personal subscription:
- Print or Online
  - CHF 995.00
  - EUR 829.00
  - USD 1016.00
- Postage and handling
  - CHF 45.60 Europe, CHF 67.20 Overseas
  - EUR 38.40
  - USD 62.40

Print or Online combined
- CHF 1043.00
- EUR 868.00
- USD 1064.00

Institutional subscription:
- Print or Online combined
  - CHF 1990.00
  - EUR 1658.00
  - USD 2033.00
- Postage and handling
  - CHF 57.00 Europe, CHF 84.00 Overseas
  - EUR 48.00
  - USD 78.00

Discount subscription prices:
Societies for Stereotactic and Functional Neurosurgery are requested to apply for appropriate discounts.

Back Volumes and Single Issues: Information on availability and prices of single print issues and print or electronic back volumes can be obtained from Customer Service at service@karger.com.

Bibliographic Indices: This journal is regularly listed in bibliographic services, including Current Contents®.

‘A collection of extraordinary essays’

GOTTFRIED SCHATZ

A MATTER OF WONDER

What Biology Reveals about Us, Our World, and Our Dreams

Where do we come from? Is our destiny determined by the genes we inherit? In this book Gottfried Schatz, the world-renowned biochemist and co-discoverer of mitochondrial DNA, gives lucid – albeit often surprising – answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines. With passion and a keen sense of wonder he draws on philosophy, cultural history and art to formulate his reflections on the mysteries of life. His essays will appeal not only to scientists but to all inquisitive minds, regardless of educational and professional background.

Contents

See the journal website for contents
Pediatric Neurosurgery strives to publish new information and observations in pediatric neurosurgery, neurology, neuroradiology and neuropathology. The focus is on the etiology of neurologic diseases, the operative care of affected patients and outcomes research. In addition to experimental and clinical studies, the journal presents critical reviews on selected topics as well as case histories and reports on advances in surgical technique. This thought-provoking approach encourages dissemination of information from neurosurgeons and neuroscientists around the world. Published material will be of interest to both researchers and clinicians who study and care for patients with pediatric, congenital, and developmental diseases of the nervous system.
