A high-yield reference book focuses on the clinical, technical, and pathological aspects of endobronchial ultrasound-guided transbronchial needle aspiration (EBUS-TBNA). Its reviews cover all aspects of EBUS-TBNA, including the clinical perspective, technical aspects of the procedure, and cytomorphology of common and uncommon entities, as well as highlights diagnostic challenges. Each chapter features a multitude of full-color high-resolution images and includes key references to the current literature in the field. Additionally, reference tables and informative figures highlight the salient points. The book is unique in that it is written by experienced thoracic surgeons, pulmonary medicine physicians, and cytopathologists who use EBUS-TBNA in a large medical center.

This publication is of interest to individuals learning and practicing cytopathology, in addition to clinicians practicing pulmonary/thoracic medicine, and cytopathologists who use EBUS-TBNA in a large medical center.

Contents

- Foreword: Herth, F.J.F.
- Preface: Monaco, S.E.; Khalbuss, W.E.; Pantanowitz, L.
- Editors/Contributing Authors
- Introduction to EBUS-TBNA: Monaco, S.E.
- Clinical and Surgical Perspectives with Comparison to Other Diagnostic Modalities: Christie, N.A.
- Review of Thoracic and Mediastinal Anatomy in EBUS-TBNA: Wilson, D.O.
- Technical Aspects of Performing EBUS-TBNA: Schuchert, M.J.
- Indications and Diagnostic Performance of EBUS-TBNA: Monaco, S.E.
- EBUS-TBNA Specimen Collection and Processing: Pantanowitz, L.
- Practical Approach to the Cytological Evaluation and Adequacy Assessment in EBUS-TBNA: Monaco, S.E.
- Normal and Nonneoplastic Components: Khalbuss, W.E.
- Pulmonary Epithelial Neoplasms: Khalbuss, W.E.
- Nonpulmonary Metastatic Carcinomas: Monaco, S.E.
- Nonepithelial Neoplasms: Pantanowitz, L.
- Thymic Lesions and Neoplasms: Pantanowitz, L.
- Contamination, Background Material, and Artifacts: Monaco, S.E.

Guidelines for Authors

Submission
Manuscripts written in English should be submitted using the online submission website at:

www.karger.com/res

Should you experience any problems with your submission, please contact:

res@karger.com

S. KARGER AG
Editorial Office ‘Respiration’
PO Box
CH–4009 Basel (Switzerland)

All manuscripts must be accompanied by a covering letter signed by all authors. Assurance should be given that the manuscript is not under simultaneous consideration by any other publication. The preferred word processing package is Word for Windows®. Presentation of manuscripts should conform with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (see N Engl J Med 1997;336:309–315).

Conditions
All manuscripts are subject to an editorial process involving the Editor-in-Chief, an Associate Editor and reviewers. Notification can be expected within two months from the date of receipt. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance.

Accepted papers become the permanent property of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Clinical Trials: In accordance with the recommendations of the International Committee of Medical Journal Editors, the journal requires that all clinical trials having commenced on or after 1 July 2005 be registered in a public trial registry accessible free of charge. Please consult http://www.icmje.org/index.html#clinical_trials for further details. Respiration has implemented the expanded definition stating that ‘any research study that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes’. Health-related interventions include any intervention used to modify a biomedical or health-related outcome (for example, drugs, surgical procedures, devices, behavioral treatments, dietary interventions, and process-of-care changes). Health outcomes include any biomedical or health-related measures obtained in patients or participants, including pharmacoepidemiological measures and adverse events. Purely observational studies (those in which the assignment of the medical intervention is not at the discretion of the investigator) will not require registration.

The journal consists of the following sections:

1. Thematic Review Series
2. Editorial Comments
3. Clinical Investigations
4. Interventional Pulmonology
5. Basic Science Investigations
6. The Eye Catcher
7. Novel Insights from Clinical Practice
8. What Is Your Diagnosis?
9. Reviews
10. Guidelines
11. Clinico-Pathological Conferences
12. Letters to the Editor

Reviews: Invited reviews, if accepted, are not subject to page charges. Unsolicited reviews may also be submitted for consideration.

Letters addressed to the Editor are encouraged if they directly concern articles previously published in this journal and clinical subjects related to the matters discussed. The editor reserves the right to submit copies of such letters to the authors of the articles concerned prior to publication in order to permit them to respond in the same issue of the journal. But letters on general scientific or medical subjects in respiratory medicine are also welcome. Letters to the Editor should be no longer than one printed page.

Eye Catchers: Maximum 1 printed page. Text may not exceed 250 words to allow sufficient space for pictorial material, which is the main object of an Eye Catcher. Maximum 2 references and 2–3 keywords.

Novel Insights from Clinical Practice (formerly Case Reports): Maximum 7 authors. The publication space available for case reports is very limited. The journal only considers case reports with significant new insights or with an extremely unusual and memorable course. Highlighted boxes containing one or two bullet points on ‘Established facts’ (what is already known) and ‘Novel insights’ (what new information has been gained) are required and should be placed on the first page of the report. These should be selected so as to reinforce the novelty of the clinical observation. The text per page should be limited to 1–2 very short sentences. The manuscript should be presented with an abstract (unstructured, max. 200 words), followed by introduction, case report and discussion. Maximum 3 figures.

What Is Your Diagnosis?: Select catchy title not disclosing the diagnosis. Page 1: Case report and 1–2 illustrations and the question ‘What Is Your Diagnosis’. Page 2: The diagnosis followed by a short description of what diagnostic procedures were done to reach the diagnosis and the discussion with references. Maximum 15 references and include 3–5 key words.

Guidelines: Consensus Guidelines are welcome from working groups to provide guidance in key and emerging areas in all fields of respiratory medicine. Such guidelines are also subject to a reviewing process.

Patient Consent: This is required for ALL articles containing personal information about the patient submitted for publication in the following sections: Novel Insights from Clinical Practice
What Is Your Diagnosis?
Eye Catcher

Signed patient consent must be obtained from the patient, guardian or next of kin (or a statement that the patient was not alive at the time of writing) and submitted along with the manuscript. For Patient Consent Form see www.karger.com/res_Guidelines

Arrangement
Pages should be numbered throughout the manuscript text.

Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Each paper needs an abstract of up to 250 words. Abstracts of papers submitted for publication in the sections Clinical Investigations, Basic Science Investigations, Interventional Pulmonology, and Technical Notes should be structured as follows:

Background: What is the major motive that prompted the study?
Objectives: What is the purpose of the study?
Methods: How was the study done?
Results: Most important findings.
Conclusions: Most important conclusions.

Introduction
What is the main question? State your considerations leading to the formulation of this question.

Material and Methods
Prior approval of an Institutional Review Board (IRB) is required for all investigations involving human subjects and animals. Animal experimentation must be performed according to the Helsinki Declaration.

Study design: Provide a short survey of the tests or experiments. Include the independent variable(s) manipulated, the dependent variable(s) measured and all controls.

Methods: Describe methods and apparatus in detail. Provide references and brief description of methods already published. Identify drugs and chemicals, including generic name, dosage and administration. Describe the pre-study condition of patients or animals.

Analysis: Define the variables. Use statistical analysis that is appropriate for the study. Describe statistical methods used for each analysis; provide references for tests that are not well known.

Results
A concise report of important results only. Use figures and tables for the presentation of data; summarize the most important observations in the text. Start and end dates of the study must be indicated (from … to, preferably exact dates, but at least months and year(s)).
Discussion
Summarize main results and make sure you can answer the question asked in the introduction, briefly supporting the answer with the relevant results. Explain and defend the answer, comment on contradictory or unexpected results and discrepancies with previous findings. Elaborate on new and important aspects of the study.

Acknowledgements
Use this section to name persons who have contributed to the article, but whose contributions do not justify authorship.

Footnotes
Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and Illustrations
Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate sheets. Tables require a heading and a figure, a legend, also prepared on a separate sheet. Due to technical reasons, figures with a screen background should not be submitted when possible, group several illustrations in one block for reproduction (max. size 180 × 223 mm) or provide crop marks. Each illustration must be labelled with its number and the first author’s name. BW half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi. Figure files must not be embedded in a document file but submitted separately (see detailed instructions at www.karger.com/res/).

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 800.00 per page.

References
In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be given as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples
(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects inflammatory mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

SI Units
Since the United States of America and other countries outside Europe where Respiration is read have not accepted the SI System, authors using SI Units should add the conventional units in parentheses, for example: pO2 = 10 kPa (75 mm Hg).

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 MB in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Page Charges
All articles are published electronically ahead of print with a DOI number and are supplemented later with the definite reference of the printed version. The articles become available immediately after the authors’ approval to publication, with the added advantage of being citable much earlier than in print. Authors can influence the time of appearance by promptly returning the proofs.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

Financial Disclosure and Conflicts of Interest
Authors must disclose any and all financial involvement in any organization with a direct financial interest in the subject discussed in the submitted manuscript. Any conflict of interest for a given manuscript must be dealt with according to the statement of the International Committee of Medical Journal Editors (the ‘Vancouer Group’) (Lancet 1995;341:742).

Further Information
For any further details please contact the Editorial Department ‘Respiration’, Fax +41 61 306 14 34.

Guidelines for Authors
ANNUAL CONGRESS SSAI-SGAI
IMPACT OF BASIC RESEARCH ON CLINICAL PRACTICE
Congress Center, Basel, 12–13 March 2015

Scientific Program

PLENARY LECTURES
Plenary Lecture 1: The impact of genomic sciences on medicine (Susan M. Gasser/Basel, CH)
Plenary Lecture 2: Clinical impact of adult onset immunodeficiency (Hans Hartmut Peter/Freiburg, D)
Plenary Lecture 3: Long-term single cell quantification: New tools for old questions (Timm Schroeder/Zurich, CH)

BASIC IMMUNOLOGY SYMPOSIA
Developmental Immunology
Hans-Reimer Rodewald (Heidelberg, D); Meinrad Busslinger (Vienna, A); Thomas Boehm (Freiburg, D)
Innate and Adaptive Immunity
Andrew McKenzie (Cambridge, UK); William Agace (Lund, S); Hans-Georg Rammensee (Tübingen, D)
Tolerance and Autoimmunity
Ludger Klein (Munich, D); Adrian Liston (Leuven, B); Anne Cooke (Cambridge UK); Bruno Kyewski (Heidelberg, D)
Infection and Immunity
Peter Staeheli (Freiburg, D); Matteo Iannacone (Milan, I); Leo C. James (Cambridge, UK)

DIAGNOSTIC LABORATORY IMMUNOLOGY SYMPOSIUM
Nils Venhoff (Freiburg, D); Florian Deisenhammer (Innsbruck, A); Ulrich Sack (Leipzig, D)

CLINICAL IMMUNOLOGY SYMPOSIA
Therapy with Biologics
Oliver Hausmann (Bern, CH); Gertjan Wolbink (Amsterdam, NL); Silja Bühler (Zurich, CH)
Immunodeficiency Disorders
Jana Pachlompik Schmid (Zurich, CH); Nathan Cantoni (Aarau, CH); Catharina Schütz (Ulm, D)
Inflammation and Immunometabolism
Marc Donath (Basel, CH); Christoph Hess (Basel, CH); Michael O. Hottiger (Zurich, CH)

ALLERGOLOGY SYMPOSIA
IgE in Allergic Diseases
Menno C. Van Zelm (Rotterdam, NL); Harald Renz (Marburg, D); tba
Vitamins and Trace Elements
René Rizzoli (Geneva, CH); Mette Berger (Lausanne, CH); Ulrich Moser (Basel, CH)
Vaccination and Immunotherapy
Antonio Lanzavecchia (Bellinzona, CH); Alfred Zippelius (Basel, CH); Cezmi A. Akdis (Davos Platz, CH)

AEROBIOLOGY SYMPOSUM
David Basler (Basel, CH); Ottmar Holdenrieder (Zurich, CH); Sereina Maibach (Bern, CH)

YOUNG INVESTIGATORS MEETING
Antonio Currao (Bern, CH); Stuart Spencer (London, UK)

More information can be found on the website (starting December 1, 2014)
www.ctlag-congress.ch
or
www.sgai.ch
The largest international tobacco control conference, the WCTOH in 2015 will highlight tobacco as a major risk factor for non-communicable diseases (NCDs), which kill some 36 million people each year.

Implementation of the WHO Framework Convention on Tobacco Control and MPOWER tobacco control measures has led to considerable progress since the WCTOH 2012 in Singapore, but many challenges remain.

Sessions will address:
- New emerging tobacco products and challenges, issues and strategies
- Post-2015 development agenda
- Supply side: from illicit trade to access by minors (FCTC Art. 15,16,17)
- Demand side: from taxes to cessation (FCTC Art. 6-14, Art. 20)
- Globalisation of tobacco industry interference (FCTC Art. 5.3)
- The role of civil society

Registration is now open
For complete programme details and registration:

THE 2015 TB SUMMIT
24th -26th March
London, UK
www.regonline.co.uk/TB2015

This three day international event will explore new research into TB detection, treatments and vaccination as well as new development in controlling and preventing TB Infection.

We welcome abstracts for oral and poster presentation and will have an open oral and poster session where abstracts can be sent relating to any aspect of TB research.

This event has CPD accreditation

PLEASE DISPLAY ON A RELEVANT NOTICE BOARD or SEND TO ANYONE YOU THINK SHOULD BE ATTENDING

Gemeinsame Jahresversammlung
Assemblée Annuelle Commune
Assemblea Annuale Comune

www.pneumo-congress.ch
16. – 17. April 2015
Palazzo dei Congressi Lugano
23rd EUROPEAN CONFERENCE ON GENERAL THORACIC SURGERY
31 May - 3 June 2015, Lisbon, Portugal

Symposium for Nurses
> Lung transplant; thoracic trauma, palliative care; pulmonary rehabilitation

7th Collaborative Postgraduate Symposium on General Thoracic Surgery
> Teams from Europe, the Americas (North and South) and Asia competing for the Masters Cup

Breakfast Sessions
Sunday 31 May 2015: How to do it
> VATS anatomical segmentectomy
> Oesocoloplasty: when and how
> Vascular access for ECMO: tips and tricks

Monday 1 June 2015: State of the Art
> Neonatal thoracic emergencies in thoracic surgery
> Diaphragmatic stimulation
> Contemporary modalities of radiation therapy: what the surgeon should know!

Tuesday 2 June 2015: Debate
> VATS lobectomy: this is the optimal access
  > Uniportal access
  > Multiportal access
> Parapneumonic Empyema
  > Early VATS debridement
  > Fibrinolytic therapy
> Surgical treatment for Mesothisioma
  > Extended pleuro-pneumonectomy
  > Decortication

Joint ESTS-EACTA Session
> Thoracic surgeons and anaesthetists: face-to-face discussion

Joint ESTS-STS Session

VATS/RATS Session
> Pros and cons of each technique

ESTS School at the Congress: hands-on sessions

Database and Quality Certification Session

Junior Lunch Symposium

Joint Pediatric Congenital Thoracic Malformations
> Treatment of long gap esophageal atresia
> Fetoscopic trachea balloon occlusion
> Pectus UP
> Cystic adenomatoid malformation: diagnosis and treatment
> Pediatric thoracic imaging interesting to thoracic surgeons

ESTS Biology Club

Joint ESTS-Portuguese-Brazilian Session
> Implementation “ab initio” of VATS lobectomy program.
> An alternative for the treatment of severe pulmonary emphysema
> Living donor lung transplant
> Mediastinal staging methods in lung cancer
> Pancoast tumor – a surgical challenge? One center’s experience

Joint ESTS-IASLC Session
> Revised staging of thoracic malignancies

Joint ESTS-Chinese Association of Thoracic Surgeons Symposium
> Thoracic surgery in China: Current status & future prospects

Joint ESTS-EACTA Session
> Thoracic surgeons and anaesthetists: face-to-face discussion

Joint ESTS-STS Session

VATS/RATS Session
> Pros and cons of each technique

ESTS School at the Congress: hands-on sessions

DEADLINE FOR EARLY REGISTRATION: 20 April 2015

For registration and information please visit
www.estsmmeetings.org/2015
This book presents a detailed and varied historical overview of the field of allergology. Beginning with insights into allergy from antiquity to the 20th century, it compiles historical reflections on the understanding of the most common allergic diseases. Important milestones in the discovery of mechanisms of allergy are described, followed by historical accounts of the detection of allergens such as pollen, dust mites, peanuts and latex, and of environmental influences such as pollution and the relationship between farmers and their environment. Several chapters illustrate the progress made in allergy management to date. Particular highlights of this book are the personal reflections of and interviews with a number of pioneers of allergy, including F. Austen, J. Bienenstock, K. Blaser, A. de Weck, A.W. Frankland, K. Ishizaka, and many more.

Not only researchers, physicians and medical historians, but also students and even non-scientists will find History of Allergy a scientific adventure well worth reading.

Contents

Allergy through 20 Centuries
- History of Allergy in Antiquity: Ring, J.
- History of Allergy in the Middle Ages and Renaissance: Ring, J.
- Landmarks in Allergy during the 19th Century: Kay, A.B.
- Milestones in the 20th Century: Bergmann, K.-C.
- Terminology of Allergic Phenomena: Ring, J.

Most Common Allergic Diseases: Historical Reflections in Understanding
- Anaphylaxis: Ring, J. et al.
- Allergic Rhinitis: Mygind, N.
- Asthma: Bergmann, K.-C.
- Atopic Dermatitis/Atopic Eczema: Wallach, D.; Taieb, A.
- Allergic Contact Dermatitis: Alkhan, A.; Maibach H.I.
- Urticaria and Angioedema: Maurer, M.
- Allergy and the Eye: Bonini, S.
- History of Food Allergy: Wüthrich, B.
- Drug Hypersensitivity: Bircher, A.J.
- Aspirin Hypersensitivity: Sánchez-Borges, M.
- Bradykinin-Mediated Disease: Kaplan, A.P.

Mechanisms of Allergy: Important Discoveries
- The Discovery of Immunoglobulin E and Its Role in Allergy: Johansson, S.G.O.
- T Cell Subpopulations: Romagnani, S.
- Mast Cell Research: Saito, H.
- Basophils: Historical Reflections and Perspectives: Marone, G. et al.
- Eosinophils: Radonij-Hösl, S.; Simon, H.-U.
- The Bradykinin-Forming Cascade: A Historical Perspective: Kaplan, A.P.
- Histamine Receptors and Antihistamines: From Discovery to Clinical Applications: Cataldí, M. et al.

Detection of Environmental Influences and Allergens
- Pollen and Pollinosis: Smith, M. et al.
- Mites and Allergy: Fernández-Caldas, E. et al.
- Mammalian Airborne Allergens: Aalberse, R.C.
- The Latex Story: Rauf, M.
- Peanut Allergens: Becker, W.-M.; Jappe, U.
- Environmental Pollution and Allergy: Historical Aspects: Behrendt, H. et al.
- Farmers and Their Environment: Protective Influences of the Farming Environment against the Development of Allergies: Gassner, M.

Progress in Allergy Management
- History of Catecholamine Research: Starke, K.
- Antihistamines: Church, M.K.; Maurer, M.
- Glucocorticoids: Barnes, P.J.
- Chromones: Edwards, A.M.
- Characterization and Standardization of Allergen Extracts: Lawenstein, H.
- Allergen-Specific Immunotherapy: Nelson, H.S.; Norman, P.S.

Pioneers of Allergy: Personal Reflections
- K. Frank Austen • John Bienenstock • Kurt Blaser • Alain de Weck (1928–2013) • Alfred William Frankland • Oscar L. Frick • Kimishige Ishizaka • Lothar Jäger • Terumasa Miyamoto • Harry Morrow Brown (1917–2013) • Albert K. Oehling • Heimo Reulecke • Václav Špičák

Allergy Societies and Collections
- AAAAI • APAAACI • CIA • EAACI • JSA • SLAAI • WAO • AAAAI Archives • The Ilya Mechnikov Collection in Riga

Online Supplementary Material
- Movie 1: Anaphylaxie et Allergie
- Movie 2: World Allergy: The Disease of Civilization
- List of Illustrations / Figure Credits
- Subject Index
An excellent overview of recent advances in diagnosis, classification and treatment

Pulmonary Vascular Disorders

Editors
Marc Humbert
Rogerio Souza

Contents
Foreword
Preface
Updated Clinical Classification of Pulmonary Hypertension: Montani, D.; Simonneau, G.
Pathology of Pulmonary Arterial Hypertension: Dorfmüller, P.
Exercise Testing in Pulmonary Arterial Hypertension: Provencher, S.; Malinouy, V.
Noninvasive Exploration of the Pulmonary Circulation and the Right Heart: Vonk Noordegraaf, A.; Peacock, A.; Naeije, R.
Biomarkers in Pulmonary Arterial Hypertension: Souza, R.; Hoette, S.; Dias, B.; Jardim, C.
Genetics of Pulmonary Arterial Hypertension and the Concept of Heritable Pulmonary Arterial Hypertension: Girerd, B.; Montani, D.; Yacii, A.; Eyries, M.; Coutet, F.; Soubrier, F.; Humbert, M.
Drug- and Toxin-Induced Pulmonary Arterial Hypertension: Price, L.; Bouillon, K.; Wort, S.; J.

Humbert, M.
Idiopathic Pulmonary Arterial Hypertension and Its Prognosis in the Modern Management Era in Developed and Developing Countries: Jiang, X.; Humbert, M.; Jing, Z.-C.
Pulmonary Arterial Hypertension Complicating Connective Tissue Disorders: Le Pavec, J.; Hassoun, P.M.
Pulmonary Arterial Hypertension and HIV and Other Viral Infections: Degano, B.; Valmery, S.; Sitbon, O.; Humbert, M.
Portopulmonary Hypertension Syndrome: Savale, L.; Hervé, P.; Sitbon, O.
Pulmonary Hypertension in Congenital Heart Diseases: Tissot, C.; Beghetti, M.
Pulmonary Hypertension in Sickle Cell Disease: Parent, F.; Savale, L.; Maitre, B.; Simonneau, G.
Pulmonary Veno-Occlusive Disease: Montani, D.; Huertas, A.; Dorfmüller, P.; Humbert, M.
Pulmonary Hypertension in Chronic Obstructive Pulmonary Disease: Weitzenblum, E.; Chaouat, A.; Canuet, M.; Duclot, A.; Kessler, R.
Pulmonary Hypertension Complicating Intestinal and Granulomatous Lung Diseases: Nunes, H.; Uzunhan, Y.; Gille, T.; Dauriat, G.; Brauner, M.; Kambouchner, M.; Valeyre, D.
High-Altitude Pulmonary Hypertension: Di, R.-M.; Jing, Z.-C.
Acute Pulmonary Venous Thromboembolic Disease: Sanchez, O.; Meyer, G.
Anticoagulation for Venous Thromboembolism in the Modern Management Era: Le Gal, G.; Leroyer, C.; Mattier, D.
Chronic Thromboembolic Pulmonary Hypertension: Lang, I.M.; Joais, X.
Medical Treatment of Pulmonary Arterial Hypertension: O’Callaghan, D.S.; Gaine, S.P.
Lung Transplantation and Role for Novel Extracorporeal Support in Pulmonary Hypertension: Hoeper, M.M.
Atrial Septostomy: Vachiery, J.-L.
Pulmonary Vascular Disorders in Hereditary Hemorrhagic Telangiectasia: Cottin, V.; Khouatra, C.; Dupuis-Girod, S.; Cardier, J.-F.
Future Perspectives in Pulmonary Arterial Hypertension: Rubin, L.J.

Author and Subject Index
89 Principles of Rehabilitation and Reactivation: Interstitial Lung Disease, Sarcoidosis and Rheumatoid Disease with Respiratory Involvement
Holland, A.E.; Dowman, L.M.; Hill, C.J. (Melbourne)

100 Disability in Moderate Chronic Obstructive Pulmonary Disease: Prevalence, Burden and Assessment – Results from a Real-Life Study
Bräido, F.; Biairdini, I. (Genova); Schichilone, N. (Palermo); Sorino, C. (Palermo/Comol); Di Marco, F. (Milan); Corsigco, A. (Pavia); Santus, P. (Milan); Giribino, G. (Messina); Di Maria, G.
