Highlight

- Coeliac Disease and Psoriasis
- PO-SCORAD Used by Parents/Patients
- Plasma Cell Vulvitis
- Imiquimod for Infantile Hemangioma
- Subtype Classification and Grading of Nasal Rosacea
- Fast-Growing Cutaneous Squamous Cell Carcinoma on Vismodegib
- Skin Cancer Detection Model
Radiofrequency (RF) has been used in many areas of medicine for some time, but only gained popularity in aesthetics in the early 2000s. Although initial procedures provided variable results, the field of RF has grown dramatically. Currently, a multitude of devices which offer an array of technologies, each geared to specific applications, are on the market. In this book, a comprehensive discussion of the evolving area of RF is provided, and the current and cutting-edge technologies which span from noninvasive treatments of facial wrinkles to invasive body contouring procedures are discussed in detail. The methodologies covered include thermal and ablative modalities, volumetric and fractional approaches, as well as practical aspects of application in clinical practice. Included are also pearls on patient management and prevention and treatment of complications. Finally, RF-based procedures are compared with equivalent laser and surgical approaches in a risk-benefit evaluation.

Reviewing the standard of care for RF-based treatments and providing information relevant for clinical decision-making and practice management, this publication is a valuable tool for dermatologists, plastic surgeons and all practitioners who use or are contemplating the introduction of RF into practice.

Contents

- Preface: Lapidoth, M.
- Basic Radiofrequency: Physics and Safety and Application to Aesthetic Medicine: Duncan, D.J.; Kreindel, M.
- Monopolar Radiofrequency: Osley, K.; Ross, N.; Saedi, N.
- Unipolar Radiofrequency: Halachmi, S.; Britva, A.; Lapidoth, M.
- Bipolar Radiofrequency: Eckhouse, S.; Onder, M.; Fritz, K.
- Fractional Radiofrequency: Halachmi, S.; Onder, M.; Fritz, K.
- Minimally Invasive Radiofrequency: Mulholland, R.S.; Halachmi, S.
- Radiofrequency Combinations: Eckhouse, S.; Fritz, K.; Adatto, M.A.
- Complications of Treatment with Radiofrequency in Aesthetic Medicine: Duncan, D.J.

Fax +41 61 306 1434
E-Mail drm@karger.com

Conditions
All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Dermatology and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Sections
The journal consists of the following sections:
- Editorials
- Original Papers
- Case and Review (This section contains case reports extended with literature reviews.)
- Case Reports
- Letters to Dermatology
- Rapid Communication/Hot Topics

We proudly publish the Newsletter of the International League of Dermatological Societies (ILDS).

Topics
Please submit papers of the following topics:
- Clinical and Laboratory Studies
- Dermatopathology
- Dermatoshay and Related Interventional Techniques
- Imaging Techniques
- Evidence-Based Dermatology
- Pharmacology and Treatment

Conflicts of Interest
Authors are required to disclose any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Conflict of interest statements will be published at the end of the article.

Plagiarism Policy
Whether intentional or not, plagiarism is a serious violation. We define plagiarism as a case in which a paper reproduces another work with at least 25% similarity and without citation. If evidence of plagiarism is found before/after acceptance or after publication of the paper, the author will be offered a chance for rebuttal. If the arguments are not found to be satisfactory, the manuscript will be retracted and the author sanctioned from publishing papers for a period to be determined by the responsible Editor(s).

Ethics
Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute’s committee on human research. Further, they should also state that animal experiments conform to institutional standards.

Rapid Communications/Hot Topics
Authors may apply to have their paper treated as a rapid communication. Condition for this is a brief and definite report of important results. Final decision whether a paper will be published as a rapid communication will be made by the Editors. A publication time of three months after acceptance is intended.

Arrangement
Papers should comprise approximately 13 pages including figures, tables and references. For technical details please refer to: www.karger.com/electroni_submission

Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Normally each paper needs an abstract of not more than 150 words. It should contain the following information: purpose of the study, procedures, results, conclusions and message of the paper.

Conclusion:

Objective: What is the purpose of the study?
Methods: How was the study performed?
Results: Most important findings?
Conclusion: Most important conclusion?
Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Examples
(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on
the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

**Supplementary Material**

Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

**Author’s Choice™**

Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

**NIH-Funded Research**

The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits your manuscript on your behalf to PubMed Central (PMC) immediately upon publication. It usually receives a PMCID within approximately a month and will appear in PMC after 12 months. For those selecting our premium Author’s Choice™ service, the usual embargo will be overridden, accelerating the accessibility of your work.

**Self-Archiving**

Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copyediting and design improvements as well as citation links.

**Page Charges**

There are no page charges for papers of 4 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of 4 printed pages is equal to approx. 13 manuscript pages (including tables, illustrations and references).

**Proofs**

Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

**E-pub First**

All articles are published electronically ahead of print with a DOI number and are supplemented later with the definite reference of the printed version. The articles become available immediately after the authors’ approval to publication, with the added advantage of being citable much earlier than in print. Authors can influence the time of appearance by promptly returning the proofs.

**Reprints**

Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

*A collection of extraordinary essays*

**GOTTFRID SCHATZ**

**A MATTER OF WONDER**

What Biology Reveals about Us, Our World, and Our Dreams

Where do we come from? Is our destiny determined by the genes we inherit? In this book Gottfried Schatz, the world-renowned biochemist and co-discoverer of mitochondrial DNA, gives lucid – albeit often surprising – answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines.

With passion and a keen sense of wonder he draws on philosophy, cultural history and art to formulate his reflections on the mysteries of life. His essays will appeal not only to scientists but to all inquisitive minds, regardless of educational and professional background.

G. Schatz (Basel)

ABSTRACT DEADLINE: 15.4.2015
Dermatopathology is a peer-reviewed online-only journal publishing original scientific articles dealing with diagnostic and experimental dermatopathology. Contributions on clinicopathological correlations, studies based on current molecular technologies as well as controversial issues and case reports are welcome. The aim of the journal is to share interesting and most recent clinicopathological information with the community of dermatopathologists all over the world and to create a stronger link between dermatopathology, clinical dermatology and investigative dermatology. Dermatopathology also provides a resource for continuing medical education in cutaneous pathology. After acceptance, articles are published online very quickly, ensuring the rapid availability of scientific knowledge for all clinicians and researchers interested in this specialty. According to the open-access principle, the contents of the journal can be retrieved at all times without any charge.
Skin Appendage Disorders provides a wide range of original and review articles dealing with all aspects of hair, nail and skin glands. The section 'Novel Insights from Clinical Practice' introduces special case examples and their treatments. Innovative therapies are presented under the heading 'Novel Treatments', and in 'Clinical Investigations' the latest findings are discussed. A special highlight are the articles in the section 'Guidelines' that present the consensus treatments, and which are a must-read for everyone who want to stay up-to-date. The section 'Adnexal Surgery' focuses on both established and approved as well as new surgical treatments. Pathological evaluation of skin appendage disorders requires specific training and the 'Pathology' section will be open to original papers and reviews on this topic.

Covering all aspects of the field, Skin Appendage Disorders is of primary importance for dermatologists in clinics and research, dermatological surgeons as well as cosmetic dermatologists.

Call for Papers
Submit your article and benefit of the advantages of publishing in Skin Appendage Disorders:
- peer-reviewed
- no page charges in 2015
- accepted articles are published online first
- Digital Object Identifiers (DOIs) facilitate the unique and persistent identification of research material
- Author’s Choice™
- self-archiving for non-commercial use
- highest ethical and quality standards in scientific publishing
- international readership and worldwide exposure

More information at www.karger.com/sad
In some respects actinic keratosis is the most common and best-known pathology in dermatology. Being such an ordinary pathology, actinic keratosis gives nevertheless insight into an extraordinary number of important biological and clinical processes. Actinic keratoses are found in significant numbers on the sun-exposed skin of Caucasians, especially those living in sun-bathed countries such as Australia, as two of the editors and a considerable number of the authors of this book do.

The authors who have contributed to this volume are researchers and clinicians discussing actinic keratosis across the whole spectrum—from epidemiology to immunology, from molecular biology to behavioral psychology—and of course pathologists and clinicians dealing with patients who experience the many manifestations of actinic keratoses. The fact that all these various aspects are considered renders this book valuable reading for scientists and clinicians alike.

Contents

Preface: Soyer, H.P.; Prow, T.W.; Jemec, G.B.E.

- Epidemiology of Actinic Keratoses: Green, A.C.
- Patients’ Perspectives on Actinic Keratoses: Esmann, S.
- Photodamage: All Signs Lead to Actinic Keratosis and Early Squamous Cell Carcinoma: Wei, J.; Kok, L.F.; Byrne, S.N.; Halliday, G.M.
- The Actinic Keratosis Virome: Can We Prevent Squamous Cell Carcinoma with a Vaccine?: Frazer, I.H.
- Do Actinic Keratoses and Superficial Squamous Cell Carcinomas Have a Specific Immunoprofile?: Wells, J.W.
- Mouse Models for Actinic Keratosis and Squamous Cell Carcinoma: Handoko, H.Y.; Ferguson, B.; Walker, G.J.
- Clinical Features of Actinic Keratoses and Early Squamous Cell Carcinoma: Wheller, L.; Soyer, H.P.

• The Many Clinico-Pathologic Faces of Actinic Keratosis: An Atlas: Massone, C.; Cerroni, L.
• Dermoscopy of Actinic Keratosis, Intraepidermal Carcinoma and Squamous Cell Carcinoma: Zalaudek, I.; Argenziano, G.
• The Future of Keratinocyte Skin Cancer Surveillance: Automated Image Analysis to Identify and Monitor Keratinocyte Dysplasia: Hames, S.C.; Prow, T.W.
• Reflectance Confocal Microscopy: Hallmarks of Keratinocyte Cancer and Its Precursors: Prow, T.W.; Tan, J.-M.; Pellacani, G.
• Optical Coherence Tomography and Its Role for Delineating the Thickness of Keratinocyte Dysplasia and Neoplasia: Themstrup, L.; Jemec, G.B.E.
• Teledermatology: Its Use in the Detection and Management of Actinic Keratosis: Janda, M.
• Conventional Treatment of Actinic Keratosis: An Overview: Peris, K.; Fargnoli, M.C.
• Field Cancerization: From Molecular Basis to Selective Field-Directed Management of Actinic Keratosis: Philipp-Dormston, W.G.
