GUIDELINES FOR AUTHORS

Submission
Manuscripts written in English should be submitted using the online submission website at:

www.karger.com/res

Should you experience any problems with your submission, please contact

res@karger.com

S. KARGER AG
Editorial Office ‘Respiration’
PO Box
CH–4009 Basel (Switzerland)

All manuscripts must be accompanied by a covering letter signed by all authors. Assurance should be given that the manuscript is not under simultaneous consideration by any other publication. The preferred word processing package is Word for Windows®. Presentation of manuscripts should conform with the Uniform Requirements for Manuscripts Submitted to Biomedical Journals (see N Engl J Med 1997;336:309–315).

Conditions
All manuscripts are subject to an editorial process involving the Editor-in-Chief, an Associate Editor and reviewers. Notification can be expected within two months from the date of receipt. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of the journal and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Clinical Trials: In accordance with the recommendations of the International Committee of Medical Journal Editors, the journal requires that all clinical trials having commenced on or after 1 July 2005 be registered in a public trial registry accessible free of charge. Please consult http://www.icmje.org/index.html#clin_trials for further details. Respiration has implemented the expanded definition stating that ‘any research study that prospectively assigns human participants or groups of humans to one or more health-related interventions to evaluate the effects on health outcomes’. Health-related interventions include any intervention used to modify a biomedical or health-related outcome (for example, drugs, surgical procedures, devices, behavioral treatments, dietary interventions, and process-of-care changes). Health outcomes include any biomedical or health-related measures obtained in patients or participants, including pharmacokinetic measures and adverse events. Purely observational studies (those in which the assignment of the medical intervention is not at the discretion of the investigator) will not require registration.

The journal consists of the following sections:

1. Thematic Review Series
2. Editorial Comments
3. Clinical Investigations
4. Interventional Pulmonology
5. Basic Science Investigations
6. The Eye Catcher
7. Novel Insights from Clinical Practice
8. What Is Your Diagnosis?
9. Reviews
10. Guidelines
11. Clinico-Pathological Conferences
12. Letters to the Editor

Reviews: Invited reviews, if accepted, are not subject to page charges. Unsolicited reviews may also be submitted for consideration.

Letters addressed to the Editor are encouraged if they directly concern articles previously published in this journal and clinical subjects related to the matters discussed. The editor reserves the right to submit copies of such letters to the authors of the articles concerned prior to publication in order to permit them to respond in the same issue of the journal. But letters on general scientific or medical subjects in respiratory medicine are also welcome. Letters to the Editor should be no longer than one printed page.

Eye Catchers: Maximum 1 printed page. Text may not exceed 250 words to allow sufficient space for pictorial material, which is the main object of an Eyecatcher. Maximum 2 references and 2–5 keywords.

Novel Insights from Clinical Practice (formerly Case Reports): Maximum 7 authors. The journal only considers case reports with significant new insights or with an extremely unusual and memorable course. Highlighted boxes containing one or two bullet points on ‘Established facts’ (what is already known) and ‘Novel insights’ (what new information has been gained) are required and should be placed on the first page of the report. These should be selected so as to reinforce the novelty of the clinical observation. The text per box should be limited to 1–2 very short sentences. The manuscript should be presented with an abstract (unstructured, max. 200 words), followed by introduction, case report and discussion. Maximum 5 figures.

What Is Your Diagnosis?: Select catchy title not disclosing the diagnosis. Page 1: Case report and 1–2 illustrations and the question ‘What Is Your Diagnosis?’. Page 2: The diagnosis followed by a short description of what diagnostic procedures were done to reach the diagnosis and the discussion with references. Maximum 15 references and include 3–5 key words.

Guidelines: Consensus Guidelines are welcome from working groups to provide guidance in key and emerging areas in all fields of respiratory medicine. Such guidelines are also subject to a reviewing process.

Patient Consent: This is required for ALL articles containing personal information about the patient submitted for publication in the following sections: Novel Insights from Clinical Practice

What Is Your Diagnosis?

Eye Catcher

Signed patient consent must be obtained from the patient, guardian or next of kin (or a statement that the patient was not alive at the time of writing) and submitted along with the manuscript. For Patient Consent Form see www.karger.com/res_Guidelines

Arrangement
Pages should be numbered throughout the manuscript text.

Title page. The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Abstract: Each paper needs an abstract of up to 250 words. Abstracts of papers submitted for publication in the sections Clinical Investigations, Basic Science Investigations, Interventional Pulmonology, and Technical Notes should be structured as follows: Background: What is the major motive that prompted the study? Objectives: What is the purpose of the study? Methods: How was the study done? Results: Most important findings. Conclusions: Most important conclusions.

Introduction
What is the main question? State your considerations leading to the formulation of this question.

Material and Methods
Prior approval of an Institutional Review Board (IRB) is required for all investigations involving human subjects and animals. Animal experimentation must be performed according to the Helsinki Declaration.

Study design: Provide a short survey of the tests or experiments. Include the independent variable(s) manipulated, the dependent variable(s) measured and all controls.

Methods: Describe methods and apparatus in detail. Provide references and brief description of methods already published. Identify drugs and chemicals, including generic name, dosage and administration. Describe the pre-study condition of patients or animals.

Analysis: Define the variables. Use statistical analysis that is appropriate for the study. Describe statistical methods used for each analysis; provide references for tests that are not well known.

Results
A concise report of important results only. Use figures and tables for the presentation of data; summarize the most important observations in the text. Start and end dates of the study must be indicated (from... to, preferably exact dates, but at least months and year(s)).

Implementation of the WHO Framework Convention on Tobacco Control and MPOWER tobacco control measures has led to considerable progress since the WCTOH 2012 in Singapore, but many challenges remain.

Sessions will address:
- New emerging tobacco products and challenges, issues and strategies
- Post-2015 development agenda
- Supply side: from illicit trade to access by minors (FCTC Art. 15,16,17)
- Demand side: from taxes to cessation (FCTC Art. 6-14, Art. 20)
- Globalisation of tobacco industry interference (FCTC Art. 5.3)
- The role of civil society

Registration is now open

The 2015 TB SUMMIT

24th - 26th March 2015
London, UK

This three day international event will explore new research into TB detection, treatments and vaccination as well as new development in controlling and preventing TB infection.

We welcome abstracts for oral and poster presentation and will have an open oral and poster session where abstracts can be sent relating to any aspect of TB research.

This event has CPD accreditation

Organised by
Endobronchial Ultrasound-Guided Transbronchial Needle Aspiration (EBUS-TBNA): A Practical Approach

Editors
Sara E. Monaco
Walid E. Khalbuss
Liron Pantanowitz

This high-yield reference book focuses on the clinical, technical, and pathological aspects of endobronchial ultrasound-guided transbronchial needle aspiration (EBUS-TBNA). Its reviews cover all aspects of EBUS-TBNA, including the clinical perspective, technical aspects of the procedure, and cytomorphology of common and uncommon entities, as well as highlights diagnostic challenges. Each chapter features a multitude of full-color high-resolution images and includes key references to the current literature in the field. Additionally, reference tables and informative figures highlight the salient points. The book is unique in that it is written by experienced thoracic surgeons, pulmonary medicine physicians, and cytopathologists who use EBUS-TBNA in a large medical center.

This publication is of interest to individuals learning and practicing cytopathology, in addition to clinicians practicing pulmonary/thoracic medicine or surgery. In short, it provides important pearls of wisdom to create a comprehensive reference for all physicians involved with EBUS-TBNA.

Contents
- Foreword: Herth, F.J.F.
- Preface: Monaco, S.E.; Khalbuss, W.E.; Pantanowitz, L.
- Editors/Contributing Authors
- Introduction to EBUS-TBNA: Monaco, S.E.
- Clinical and Surgical Perspectives with Comparison to Other Diagnostic Modalities: Christie, N.A.
- Review of Thoracic and Mediastinal Anatomy in EBUS-TBNA: Wilson, D.O.
- Technical Aspects of Performing EBUS-TBNA: Schuchert, M.J.
- Indications and Diagnostic Performance of EBUS-TBNA: Monaco, S.E.
- EBUS-TBNA Specimen Collection and Processing: Pantanowitz, L.
- Practical Approach to the Cytological Evaluation and Adequacy Assessment in EBUS-TBNA: Monaco, S.E.
- Normal and Nonneoplastic Components: Khalbuss, W.E.
- Pulmonary Epithelial Neoplasms: Khalbuss, W.E.
- Nonpulmonary Metastatic Carcinomas: Monaco, S.E.
- Nonepithelial Neoplasms: Pantanowitz, L.
- Thymic Lesions and Neoplasms: Pantanowitz, L.
- Contamination, Background Material, and Artifacts: Monaco, S.E.

The Tobacco Epidemic
2nd, revised and extended edition

Editors
Robert Loddenkemper
Michael Kreuter

The Tobacco Epidemic provides a comprehensive update of the clinical, public health and political aspects of tobacco smoking. Since its 1st edition in 1997, knowledge on the health hazards of tobacco and nicotine addiction has increased considerably, but recent data has shown that the global problem has become more aggravated in low- and middle-income countries: if current trends continue, tobacco smoking will be responsible for the deaths of 1 billion people in the 21st century.

Written by outstanding international experts, the book covers the history of tobacco production and use, the economics of tobacco use and control, as well as the health consequences of active and passive smoking in both adults and children. Special chapters discuss the impact of media, movies and TV on tobacco consumption in young people, the patterns and predictors of smoking cessation in the general population and in different social subgroups, and initiatives supported by the WHO Framework Convention on Tobacco Control. Readers will find the latest information on how nicotine dependence is treated with nicotine replacement products, what role health care professionals play in helping smokers to quit and what effects smoke-free environments, advertising bans and price increases have on smoking prevalence. The potential harms and benefits of smokeless tobacco, waterpipe tobacco smoking and electronic cigarettes are also evaluated.

This book is a must-read for anyone in the medical profession who treats patients with smoking-related diseases and for those engaged in tobacco control. It will also be appreciated by interested nonmedical readers like journalists and legislators.

Contents

• Foreword/Preface
• History of Tobacco Production and Use: Hanafin, J.; Clancy, L.
• Global Tobacco Epidemic: Mackay, J.; Schluger, N.
• The Tobacco Epidemic and the Commercial Sector: Tobacco Industry Strategy to Increase Profits and Prevent Regulation: Weishaar, H.
• Chemistry and Primary Toxicity of Tobacco and Tobacco Smoke: Wiebel, F.J.
• Nicotine Dependence: Zaveri, N.T.; Rollema, H.; Swan, G.E.
• The Psychology of the Smoker: Gilbert, D.G.; Pergadia, M.L.
• Respiratory Disorders Related to Smoking Tobacco: Murray, J.F.; Buist, A.S.
• Cardiovascular and Other (Except Respiratory) Disorders Related to Smoking Tobacco: Barnoya, J.; Monzon, J.C.
• Health Effects of Passive Smoking in Children: Bush, A.
• Health Effects of Passive Smoking in Adults: Clancy, L.; Kabir, Z.
• Economics of Tobacco Use and Control: Townsend, J.
• Legislation and Smoking Prevention: Latif, E.; Warner, V.
• The WHO Framework Convention on Tobacco Control: Pötschke-Langer, M.; Schotte, K.; Szilagyi, T.
• Youth and Tobacco: Bauer, C.; Kreuter, M.
• Impact of Media, Movies and TV on Tobacco Use in the Youth: Sargent, J.D.; Hanewinkel, R.
• Social Determinants of Cigarette Smoking: Upson, D.
• Smoking and Mental Health Problems: Caillé, S.; Baker, A.L.; Todd, J.; Turner, A.; Dayas, C.V.
• Patterns and Predictors of Smoking Cessation: Ditre, J.W.; Zale, E.L.; Brandon, T.H.
• Examining the Role of the Health Care Professional in Controlling the Tobacco Epidemic: Individual, Organizational and Institutional Responsibilities: Leone, F.T.; Evers-Casey, S.
• Pharmacotherapy: Nicotine Replacement Therapy and Other Drugs in Smoking Cessation (Including Vaccination): Tonnesen, P.
• Smokeless Tobacco — Health Hazards or Less Harm?: Bolinder, G.; Gilljam, H.
• Waterpipe Tobacco Smoking: A Less Harmful Alternative?: Jawad, M.
• Electronic Cigarettes: The Issues behind the Moral Quandary: Vardavas, C.I.; Agaku, J.T.
