The hippocampus is one of the most intriguing structures of the human brain. Damage to this part causes symptoms ranging from transient disorders accompanied by tiny lesions to severely debilitating cognitive disorders with marked tissue loss. This publication provides a predominantly clinical approach to the complex workings of the hippocampus from different perspectives, ranging from basic principles to specific diseases. The first part of the book summarizes current knowledge regarding the structure and physiology of the hippocampus and establishes the ties to basic neuroscience. The second part deals with the function and assessment of the human hippocampus, including memory function, neuropsychological measures, and conventional and functional imaging studies. The chapters of the third part are devoted to the hippocampus in neurological disorders, e.g. the interaction between stress and memory function, and the pathological conditions of common as well as selected rare neurological diseases affecting the hippocampus. The book is highly recommended to clinical neurologists who wish to gain a broad understanding of this complex and fascinating organ in terms of basic principles, modern imaging findings, and specific diseases.
Psychotherapy and Psychosomatics publishes research articles on clinical issues in medicine and psychiatry, with special reference to psychotherapy and psychosomatic research. The journal features editorials and reviews, articles on current and controversial issues; innovations (both in terms of conceptualization and pilot studies); case management articles (biopsychosocial management in clinical medicine); clinical notes; letters to the editor (both comments on published articles and preliminary research).

Submission
Only papers written in English are considered and should be submitted using the online submission website at:

www.karger.com/pps

Conditions
All manuscripts are subject to editorial review. Manuscripts are accepted with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Psychotherapy and Psychosomatics and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Conflict of Interest
All forms of support and financial involvement (e.g., employment, consultancies, honoraria, stock ownership and options, expert testimony, grants or patents received or pending, royalties) which took place in the previous three years should be listed in the acknowledgement section of the paper, regardless of their potential relevance to the paper. In the cover letter to the editor, the corresponding author should certify that all forms of conflict of interest by all authors were clearly identified in the text. Authors of systematic reviews concerned with therapeutics are asked to report funding sources and conflicts of interest of the studies that were selected.

Arrangement
Title page: The first page of each paper should indicate the title, the authors' names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Abstracts should be no longer than 250 words for regular articles, and no longer than 150 words for clinical notes. They should include the following information: Background: the problem that prompted the study and the purpose of the study; Methods: data sources, subjects, designs, measurements, data analysis; Results: most important findings; Conclusions: implications, future directions. Abstracts for Special Articles do not need to be structured. Editorials, Case Management articles and Letters to the Editor should not have an abstract.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate sheets. Tables require a heading and figures a legend, also prepared on a separate sheet. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 × 223 mm) or provide crop marks. On the back of each illustration, indicate its number, the author's name, and 'top' with a soft pencil. Electronically submitted black-and-white half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 800.00 per page.

Data analysis: Adequate description of statistical analysis should be provided, including the types of statistical tests and whether they were one- or two-tailed. Standard deviations, instead of standard errors of the mean, are preferred. All significant results must include the test value, degree(s) of freedom, and probability level.

References: In the text, identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples
(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin 6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI 10.1159/000063858.

Reference Management software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any further editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, avi, mpg).

Author's Choice™
Karger's Author's Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.Karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author's Choice™ service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH's Public Access Policy is available at http://publicaccess.nih.gov/policy.htm

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger's Author's Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copyrighting and design improvements as well as citation links.

Page Limitations and Charges
There are no page charges for papers of 7 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 18 manuscript pages (including tables, illustrations and references). Letters commenting on published articles should not exceed 500 words of text plus references. Re-search letters should not exceed 1,000 words of text plus a maximum of 10 references. They may have only one table or figure.

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

The Tobacco Epidemic

2nd, revised and extended edition

Editors

Robert Loddenkemper
Michael Kreuter

This completely revised and enlarged 2nd edition of *The Tobacco Epidemic* provides a comprehensive update of the clinical, public health and political aspects of tobacco smoking. Since its 1st edition in 1997, knowledge on the health hazards of tobacco and nicotine addiction has increased considerably, but recent data has shown that the global problem has become more aggravated in low- and middle-income countries; if current trends continue, tobacco smoking will be responsible for the deaths of 1 billion people in the 21st century.

Written by outstanding international experts, the book covers the history of tobacco production and use, the economics of tobacco use and control, as well as the health consequences of active and passive smoking in both adults and children. Special chapters discuss the impact of media, movies and TV on tobacco consumption in young people, the patterns and predictors of smoking cessation in the general population and in different social subgroups, and initiatives supported by the WHO Framework Convention on Tobacco Control. Readers will find the latest information on how nicotine dependence is treated with nicotine replacement products, what role health care professionals play in helping smokers to quit and what effects smoke-free environments, advertising bans and price increases have on smoking prevalence. The potential harms and benefits of e-cigarettes are also evaluated.

This book is a must-read for anyone in the medical profession who treats patients with smoking-related diseases and for those engaged in tobacco control. It will also be appreciated by interested nonmedical readers like journalists and legislators.

Contents

- Foreword/Preface
- History of Tobacco Production and Use: Hanafin, J.J.; Clancy, L.
- Global Tobacco Epidemic: Mackay, J.; Schlüter, N.
- The Tobacco Epidemic and the Commercial Sector: Tobacco Industry Strategy to Increase Profits and Prevent Regulation: Weishaar, H.
- Chemistry and Primary Toxicity of Tobacco and Tobacco Smoke: Wiebel, F.J.
- Nicotine Dependence: Zaveri, N.T.; Rollema, H.; Swan, G.E.
- The Psychology of the Smoker: Gilbert, D.G.; Pergadia, M.L.
- Respiratory Disorders Related to Smoking Tobacco: Murray, J.F.; Buist, A.S.
- Cardiovascular and Other (Except Respiratory) Disorders Related to Smoking Tobacco: Barnoya, J.; Monzon, J.C.
- Health Effects of Passive Smoking in Children: Bush, A.
- Health Effects of Passive Smoking in Adults: Clancy, L.; Kabir, Z.
- Economics of Tobacco Use and Control: Townsend, J.
- Legislation and Smoking Prevention: Latif, E.; Warnicke, V.
- The WHO Framework Convention on Tobacco Control: Pötschke-Langer, M.; Schotte, K.; Szilagyi, T.
- Youth and Tobacco: Bauer, C.; Kreuter, M.
- Impact of Media, Movies and TV on Tobacco Use in the Youth: Sargent, J.D.; Hanewinkel, R.
- Social Determinants of Cigarette Smoking: Upton, D.
- Patterns and Predictors of Smoking Cessation: Ditre, J.W.; Zale, E.L.; Brandon, T.H.
- Examining the Role of the Health Care Professional in Controlling the Tobacco Epidemic: Individual, Organizational and Institutional Responsibilities: Leone, F.T.; Evers-Casey, S.
- Pharmacotherapy: Nicotine Replacement Therapy and Other Drugs in Smoking Cessation (Including Vaccination): Tønnessen, P.
- Smokeless Tobacco – Health Hazards or Less Harm?: Bollinger, G.; Gilljam, H.
- Waterpipe Tobacco Smoking: A Less Harmful Alternative?: Jawad, M.
- Electronic Cigarettes: The Issues behind the Moral Quandary: Vardavas, C.I.; Agaku, I.T.
