The Tobacco Epidemic
2nd, revised and extended edition

Editors
Robert Loddenkemper
Michael Kreuter

This completely revised and enlarged 2nd edition of The Tobacco Epidemic provides a comprehensive update of the clinical, public health and political aspects of tobacco smoking. Since its 1st edition in 1997, knowledge on the health hazards of tobacco and nicotine addiction has increased considerably, but recent data has shown that the global problem has become more aggravated in low- and middle-income countries: if current trends continue, tobacco smoking will be responsible for the deaths of 1 billion people in the 21st century.

Written by outstanding international experts, the book covers the history of tobacco production and use, the economics of tobacco use and control, as well as the health consequences of active and passive smoking in both adults and children. Special chapters discuss the impact of media, movies and TV on tobacco consumption in young people, the patterns and predictors of smoking cessation in the general population and in different social subgroups, and initiatives supported by the WHO Framework Convention on Tobacco Control. Readers will find the latest information on how nicotine dependence is treated with nicotine replacement products, what role health care professionals play in helping smokers to quit and what effects smoke-free environments, advertising bans and price increases have on smoking prevalence. The potential harms and benefits of smokeless tobacco, waterpipe tobacco smoking and electronic cigarettes are also evaluated.

This book is a must-read for anyone in the medical profession who treats patients with smoking-related diseases and for those engaged in tobacco control. It will also be appreciated by interested nonmedical readers like journalists and legislators.

Contents

- Foreword/Preface
- History of Tobacco Production and Use: Hanafin, J.; Clancy, L.
- Global Tobacco Epidemic: Mackay, J.; Schlugner, N.
- The Tobacco Epidemic and the Commercial Sector: Tobacco Industry Strategy to Increase Profits and Prevent Regulation: Weishaar, H.
- Chemistry and Primary Toxicity of Tobacco and Tobacco Smoke: Wiebel, F.J.
- Nicotine Dependence: Zawer, N.T.; Rollema, H.; Swan, G.E.
- The Psychology of the Smoker: Gilbert, D.G.; Vergadia, M.L.
- Respiratory Disorders Related to Smoking Tobacco: Murray, J.F.; Buist, A.S.
- Cardiovascular and Other (Except Respiratory) Disorders Related to Smoking Tobacco: Barnoya, J.; Monzon, J.C.
- Health Effects of Passive Smoking in Children: Bush, A.
- Health Effects of Passive Smoking in Adults: Clancy, L.; Kabir, Z.
- Economics of Tobacco Use and Control: Townsend, J.
- Legislation and Smoking Prevention: Lastif, E.; Warner, V.
- The WHO Framework Convention on Tobacco Control: Pötschke-Langer, M.; Schotte, K.; Szilagyi, T.
- Youth and Tobacco: Bauer, C.; Kreuter, M.
- Impact of Media, Movies and TV on Tobacco Use in the Youth: Sargent, J.D.; Henawinkle, R.
- Social Determinants of Cigarette Smoking: Upson, D.
- Patterns and Predictors of Smoking Cessation: Ditre, J.W.; Zale, E.L.; Brandon, T.H.
- Examining the Role of the Health Care Professional in Controlling the Tobacco Epidemic: Individual, Organizational and Institutional Responsibilities: Leone, F.T.; Evers-Casey, S.
- Pharmacotherapy: Nicotine Replacement Therapy and Other Drugs in Smoking Cessation (Including Vaccination): Tønnesen, P.
- Smokeless Tobacco – Health Hazards or Less Harm?: Bolinder, G.; Gilljam, H.
- Waterpipe Tobacco Smoking: A Less Harmful Alternative?: Jawad, M.
- Electronic Cigarettes: The Issues behind the Moral Quandary: Vardavas, C.I.; Agaku, I.T.

orders@karger.com, t +41 61 306 12 34
www.karger.com
Psychopathology addresses scientists who work on descriptive psychopathology in clinical contexts, or with experimental methods in neuropathology and experimental psychopathology, or on conceptual framing of psychopathological findings for understanding pathogenesis and for validation of diagnosis and classification. They may include an interdisciplinary approach to other medical and biological fields or to the humanities. Psychopathology does not only invite reports on medical research but also wants to address psychologists who refer to pathological phenomena or work within clinical settings. The central field of interest is the convergence of clinical phenomena, experimental findings, and conceptualisation. This would also include describing pathogenetic mechanisms of disturbed neuropsychological functions which allows remodelling and evaluation of psychotherapeutic tools.

Types of Papers
Psychopathology accepts papers on the following sections: Original Paper, Review, Short Report (up to 8 manuscript pages). Reviews may contain overviews, meta-analyses and conceptual papers based on a literature overview; Original Papers contain data generated by the authors; Short Reports will also be restricted to relevant issues of scientific debate.

Submission
Only original papers written in English are considered and should be submitted using the online submission website at:
www.karger.com/psp

Should you experience any problems with your submission, please contact:
Shirin.Neidlein@med.uni-heidelberg.de
Editorial Office Psychopathology
Zentrum für Psychosoziale Medizin
Klinik für Allgemeine Psychiatrie
Universität Heidelberg
Voßstr. 4
D–69115 Heidelberg
Tel. +49 6221 56 7308
Fax +49 6221 56 5477

Conditions
All manuscripts are subject to editorial review. Manuscripts are accepted with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Psychopathology and may not be reproduced by anyone, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Arrangement
Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: The abstract should not exceed 30 lines and should be structured as follows: Background, Sampling and Methods, Results, and Conclusions (including study limitations).

Methods: Sampling should be described in detail so that possible selection biases may be discussed. Methods should be reported in a manner enabling easy replication. Results: The results should be described precisely and must be separated from the discussion.

Discussion: The discussion should move along the same lines as the results and should discuss the relevant literature with regard to consistencies and inconsistencies as well as elucidate on the theoretical and practical implications of the results. Further research perspectives may be addressed, e.g. concerning clarification of inconsistencies with the literature.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate sheets. Tables require a heading and figures a legend, also prepared on a separate sheet. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one black-and-white negative (max. size 180 x 223 mm) or provide crop marks. Electronically submitted b/w half-tone color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legend.

Print edition: Up to 2 color illustrations per page can be integrated within the text at CHF 800.00 per page.

References: In the text, identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples
(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All files and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, avi, .mpeg).

Author’s Choice™
With this option the author can choose to make his article freely available online against a one-time fee of CHF 3000.00. This fee is independent of any standard charges for supplementary pages, color images etc. which may apply. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central (PMC) immediately upon publishing. It usually receives a PMCID within approximately a month and will appear in PMC after 12 months. For those selecting our premium Author’s Choice™ service, the usual embargo will be overridden, accelerating the accessibility of your work. More details on NIH’s Public Access Policy are available at http://publicaccess.nih.gov/policy.htm

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copyediting and design improvements as well as citation links.

Page Charges
There is no page charge for papers of 5 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 14 manuscript pages (double-spaced, including tables, illustrations and references).

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

European Addiction Research is a unique international scientific journal for the rapid publication of innovative research covering all aspects of addiction and related disorders. Representing an interdisciplinary forum for the exchange of recent data and expert opinion, it reflects the importance of a comprehensive approach to resolve the problems of substance abuse and addiction in Europe. Coverage ranges from clinical and research advances in the fields of psychiatry, biology, pharmacology and epidemiology to social, and legal implications of policy decisions. The goal is to facilitate open discussion among those interested in the scientific and clinical aspects of prevention, diagnosis and therapy as well as dealing with legal issues. An excellent range of original papers makes European Addiction Research the forum of choice for all.
