Karger Publishers – 125 Years of Experience in Medical and Scientific Publishing

Karger Publishers – independent, family-run and Swiss-based.

It is our goal to serve the global scientific community with innovative and outstanding publications in all fields of medical science. This means dedication to maintaining the highest standards of quality, as well as personalized service for authors, editors and readers.

www.karger.com

Please order a free copy of the Karger Festschrift ‘Connecting the World of Biomedical Science’ by sending your address to 125years@karger.com.
Conflicts of Interest
Authors are required to disclose any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Conflict of interest statements will be published at the end of the article.

Arrangement
Title page: The first page of each paper should indicate the title, authors’ names, institute where the work was conducted, and a short title for use as running head.
Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.
Key words: For indexing purposes, a list of 5–10 key words in English is essential.
Abstract: Each paper needs an abstract in English of up to 10 lines.
Footnotes: Avoid footnotes.
Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be stored in separate files. Tables require a heading and figures a legend, also in separate files. Labels of illustrations should begin with an upper-case letter and be centered; units should be in parentheses. For graphs containing coordinates (plots) please conform to the sample figure shown in the Guidelines for Authors at: www.karger.com/aud_Guidelines.

Types of Papers
Papers of the following types are considered for publication:
- Original Paper
- Review
- Mini Review
- Editorial

Reviews and Mini Reviews
Most (Mini) Reviews are submitted upon invitation. However, the editors are open to unsolicited (Mini) Reviews. Authors planning to submit a (Mini) Review are requested to contact the Editorial Office with an outline of the intended contribution. All (Mini) Reviews are subject to peer review.

Examples
(b) Papers published only with DOI numbers: Theocharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Author’s Choice

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting the premium Author’s Choice service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual delay.
A Matter of Wonder
What Biology Reveals about Us, Our World, and Our Dreams

Where do we come from? Is our destiny determined by the genes we inherit? In this book Gottfried Schatz, the world-renowned biochemist and co-discoverer of mitochondrial DNA, gives lucid – albeit often surprising – answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines. With passion and a keen sense of wonder he draws on philosophy, cultural history and art to formulate his reflections on the mysteries of life. His essays will appeal not only to scientists but to all inquisitive minds, regardless of educational and professional background.

G. Schatz (Basel)
A Matter of Wonder
What Biology Reveals about Us, Our World, and Our Dreams
Translated by A. Shields

**General Information**

### Subscription Rates:
Subscriptions run for a full calendar year. Prices are given per year.

- **Personal subscription:**
  - Print or Online: CHF 618.00
  - Print+Online combined: CHF 666.00
- **Institutional subscription:**
  - Print or Online: CHF 1767.00
  - Print+Online combined: CHF 2032.00

**Discount subscription prices:**
- Members of ISA; Italian Society of Audiology: USD 78.00
- ARO please ask for special rates.

### Back Volumes and Single Issues:
Information on availability and prices of single print issues and print or electronic back volumes can be obtained from Customer Service at service@karger.com.

### Bibliographic Indices:
This journal is regularly listed in bibliographic services, including Current Contents® and PubMed/MEDLINE.

### Photocopying:
This journal has been registered with the Copyright Clearance Center (CCC), as indicated by the code appearing on the first page of each article. For readers in the US, this code signals consent for copying of articles for personal or internal use, or for the personal or internal use of specific clients, provided that the stated fee is paid per copy directly to Copyright Clearance Center Inc. 222 Rosewood Drive Danvers, MA 01923 (USA).

A copy of the first page of the article must accompany payment. Consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. In these cases, specific written permission must be obtained from the copyright owner, S. Karger AG, P.O. Box CH-4009 Basel (Switzerland).

Providing up-to-date reports of training models for speech-language pathologists and audiologists implemented in different parts of the world

New Horizons in Speech Language Pathology

Current academic and clinical training models for speech-language pathologists and audiologists as well as articles on training needs are presented in this issue. Also discussed are current and evolving curricula as well as philosophies of training. Furthermore, the integration of speech-language pathology education with considerations of literacy and language learning disorders and the possibility of a new type of speech-language pathologist trained to understand the public health implications of communication disorders are reviewed. The information provided on training opportunities and concepts in Eastern European countries is unique and new, as are the proposals for including extensive literacy training in speech-language pathology programs and for a new type of speech-language pathologist whose training includes public health issues.

Faculty members engaged in educating speech-language pathologists will find important new results to consider in potential future developments of training models in the field of communication disorders. For professionals interested in global variations of communication sciences and disorders, and the possibility of moving toward some universal standards for accredited practitioners, this special issue is valuable reading.

Pearls and Pitfalls in Head and Neck Surgery
Practical Tips to Minimize Complications

Editor
Claudio R. Cernea

Associate Editors
Fernando L. Dias, Dan Fliss, Roberto A. Lima
Eugene N. Myers, William I. Wei

In this unique volume, leading international experts share their experiences in the management of head and neck tumors, providing a guidebook for all surgeons dealing with head and neck neoplasms. Each chapter offers a concise description of useful 'pearls' and dangerous 'pitfalls' which must be avoided. Contributions cover topics from thyroid glands, neck metastases, and oral tumors to laryngeal, pharyngeal, and nasopharyngeal tumors, as well as salivary gland tumors, skull base tumors, and reconstruction surgery. In addition to frequent diseases which are encountered in everyday practice, some new therapeutic topics such as video-assisted thyroidectomy, robotic surgery, and management of the neck after organ preservation treatment are discussed. The 2nd edition has been extended by topical chapters of major practical interest including the latest findings and techniques. The new chapters are clearly indicated and can be recognized easily. Head and neck surgeons, otolaryngologists, neurosurgeons, maxillofacial surgeons, plastic surgeons, radiation and clinical oncologists, and general surgeons, as well as students and residents interested in the management of head and neck tumors, will find this publication an indispensable manual.

Contents

- Thyroid and Parathyroid Glands
- Neck Metastases
- Oral/Oropharyngeal Tumors
- Laryngeal Tumors
- Hypopharyngeal Cancer
- Nasopharyngeal Cancer
- Salivary Gland Tumors
- Skull Base Tumors
- Vascular Tumors
- Parapharyngeal Space Tumors
- Infections of Head and Neck
- Tracheostomy
- Reconstruction
- Miscellaneous
