Growth hormone therapy in Noonan syndrome: a systematic review

(see paper by Giacomozzi et al., pp. 167–176)
Karger Publishers –
125 Years of Experience
in Medical and
Scientific Publishing

Karger Publishers – independent, family-run
and Swiss-based.

It is our goal to serve the global scientific community
with innovative and outstanding publications in
all fields of medical science. This means dedication to
maintaining the highest standards of quality, as well
as personalized service for authors, editors and readers.

Printed in Switzerland on acid-free and non-aging paper (ISO 9706) by Werner Druck & Medien AG, Basel
We propose that a highlighted box containing one
of references is imposed. Statements for the
highlighted box should also be included.

**Conditions**

All manuscripts are subject to editorial review. The
names and addresses of six experts in the appropriate
area of research should accompany each manuscript.
Selected scientist(s) will be invited to act as referee(s).
Manuscripts are received with the explicit under-
standing that they are not under simultaneous con-
sideration by any other publication. Submission of an
article for publication implies the transfer of the
copyright from the author to the publisher upon ac-
ceptance. Accepted papers become the permanent
property of Hormone Research in Paediatrics and may
not be reproduced by any means, in whole or in part,
without the written consent of the publisher.

It is the author’s responsibility to obtain permission
to reproduce illustrations, tables, etc. from other pub-
lications.

**Arrangement**

**Title page:** The first page of each paper should indi-
cate the title, the authors’ names, the institute where
the work was conducted, and a short title for use as
running head.

**Full address:** The exact postal address of the corre-
sponding author complete with postal code must be
given at the bottom of the title page. Please also sup-
ply phone and fax numbers, as well as e-mail address.

**Key words:** Please supply 3–10 key words in English
that reflect the content of the paper.

**Abstract:** Each paper needs an abstract of up to 200
words. It should be structured as follows:

- **Background/Aims:** What is the major problem that
  prompted the study?
- **Methods:** How was the study done?
- **Results:** Most important findings?
- **Conclusion:** Most important conclusion?

**Footnotes:** Avoid footnotes. When essential, they are
numbered consecutively and typed at the foot of the
appropriate page.

**Tables and illustrations:** Tables and illustrations (both
numbered in Arabic numerals) should be prepared on
separate pages. Tables require a heading and fig-
ures a legend, also prepared on a separate page. Due
to technical reasons, figures with a screen  background
should not be submitted. When possible, group sev-
eral illustrations on one block for reproduction (max.
size 180 × 223 mm) or provide crop marks.

**Color illustrations**

- **Online edition:** Color illustrations are reproduced
  free of charge. In the print version, the illustrations
  are reproduced in black and white. Please avoid re-
  ferring to the colors in the text and figure legends.

- **Print edition:** Up to 6 color illustrations per page can
  be integrated within the text at CHF 800.00 per page.

**References:** In the text identify references by Arabic
numerals [in square brackets]. Material submitted for
publication but not yet accepted should be noted as
[unpublished data] and not be included in the refer-
ce list. The list of references should include only
those publications which are cited in the text. Do not
alphabetize; number references in the order in which
they are first mentioned in the text. The surnames of
the authors followed by initials should be given.
There should be no punctuation other than a com-
ma to separate the authors. Preferably, please cite all
authors. Abbreviate journal names according to the
Index Medicus system. Also see International Com-
mon Medical Journal Editors: Uniform require-
ments for manuscripts submitted to biomedical jour-
nals (www.icmje.org).

**Examples**

- (a) Papers published in periodicals: Sun J, Koto H,
  Chung KF: Interaction of ozone and allergen chal-
gendes in bronchial responsiveness and allergen
  sensitisation in sensitised guinea pigs. Int Arch Allergy

- (b) Papers published only with DOI numbers:
  Theoharides TC, Boucher W, Spear K: Serum inter-
  leukin-6 reflects disease severity and osteoporosis
  in mastocytosis patients. Int Arch Allergy Immunol
  DOI: 10.1159/000063858.

- (c) Monographs: Matthews DE, Farewell, VT: Using
  and Understanding Medical Statistics, ed 3, revised.
  Basel, Karger, 1996.

- (d) Edited books: Parren PW, Burton DR: Anti-
  bodies against HIV-1 from phage display libraries;
  Mapping of an immune response and progress to-
  wards antiviral immunotherapy; in Capra JD (ed):
  Antibody Engineering. Chem Immunol. Basel, Kar-

**Reference Management Software:** Use of EndNote is
recommended for easy management and formatting
of citations and reference lists.

**Digital Object Identifier (DOI)**

S. Karger Publishers supports DOIs as unique iden-
tifiers for articles. A DOI number will be printed on
the title page of each article. DOIs can be useful in
the further identification and citing of articles published
online without volume or issue information. More in-
formation can be found at www.doi.org.

**Supplementary Material**

Supplementary material is restricted to additional
data that are not necessary for the scientific integ-
reliability and conclusions of the paper. Please note that
all supplementary files will undergo editorial review
and should be submitted together with the original
manuscript. The Editors reserve the right to limit the
scope and length of the supplementary material. Sup-
plementary material must meet production quality
standards for Web publication without the need for
any modification or editing. In general, supplemen-
tary files should not exceed 10 Mb in size. All fig-
ures and tables should have titles and legends and all
files should be supplied separately and named clearly.
Acceptable files and formats are: Word or PDF files,
Excel spreadsheets (only if the data cannot be con-
verted properly to a PDF file), and video files (.mov,
.avi, .mpeg).

**Author’s Choice**

Karger’s Author’s Choice service broadens the
reach of your article and gives all users worldwide free
and full access for reading, downloading and printing
at www.karger.com. The option is available for a one-
time fee of CHF 3,000.00, which is a permissible cost
in grant allocation. More information can be found at
www.karger.com/authors_choice.

**NIH-Funded Research**

The U.S. National Institutes of Health (NIH) man-
dates under the NIH Public Access Policy that final,
peer-reviewed manuscripts appear in its digital data-
tabase within 12 months of the official publication

HORMONE RESEARCH IN PÆDIATRICS

date. As a service to authors, Karger submits the final version of your article to PubMed Central, where it will appear after a standard embargo. More details on NIH’s Public Access Policy are available at http://publicaccess.nih.gov/policy.htm

Self-Archiving
Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright.

Page Charges
There is no page charge for papers of 4 or fewer printed pages (including tables, illustrations and references). Each additional complete or partial page is charged to the author at CHF 650.00. The allotted size of a paper is equal to approx. 12 manuscript pages (including tables, illustrations and references). As the page charges are waived in any case for the first paper each year to be published by a member of ESPE or PES, authors who are members of the ESPE or PES should so indicate on the title page.

Proofs
Unless indicated otherwise, a PDF for correction is sent to the corresponding author and should be returned with the least possible delay. Alterations other than the correction of printer’s errors are charged to the author.

E-pub First
All articles are published electronically ahead of print with a DOI number and are supplemented later with the definite reference of the printed version. The articles become available immediately after the authors’ approval to publication, with the added advantage of being citable much earlier than in print. Authors can influence the time of appearance by promptly returning the proofs.

Reprints
Order form and price list is sent with the PDF. Orders submitted after the issue is printed are subject to considerably higher prices.

Pediatric and Adolescent Medicine

A series for both the general practitioner and the hospital physician

This series deals with rapidly evolving pediatric subspecialties such as perinatal medicine, pediatric endocrinology, immunology, neurology and cardiology. The individual volumes not only highlight recent advances in a particular area, but also provide a comprehensive overview of new trends in monitoring child development and subsequent adult health. The series aims to inform both the general practitioner and the hospital physician about current theoretical and practical developments in pediatric and adolescent medicine.

Paediatric Thyroid Disorders: New Insights

Editors
Michel Polak
Gabor Szinnai

New data concerning screening, diagnosis and management is important for a constant broadening of our knowledge and expertise. This special topic issue of Hormone Research in Paediatrics focuses on new developments in the field of thyroid disease in the paediatric age group. Topics covered include epidemiology, screening, radiologic approaches, and new molecular data. Reviews of specific diseases associated with thyroid disorders such as Down syndrome, Rett syndrome, and pseudohypoparathyroidism add new insights into clinically relevant questions. Providing a selection of papers on clinical and molecular aspects of congenital hypothyroidism, this special topic issue offers an update on fetal, neonatal, and childhood thyroidology in patients suffering from congenital hypothyroidism, namely thyroid disease associated with genetic syndromes.

Contents

Preface
• Paediatric Thyroid Disorders: New Insights: Polak, M.; Szinnai, G.

Original Papers
• Somatic Mutations Are Not Observed by Exome Sequencing of Lymphocyte DNA from Monozygotic Twins Discordant for Congenital Hypothyroidism due to Thyroid Dysgenesis: Magne, F.; Serpa, R.; Van Vliet, G.; Samuels, M.E.; Deladoue, J.
• Multiple Factors Influencing the Incidence of Congenital Hypothyroidism Detected by Neonatal Screening: Olivieri, A.; Fazzini, C.; Medda, E.; The Italian Study Group for Congenital Hypothyroidism
• The Role of 123I Imaging in the Evaluation of Infants with Mild Congenital Hypothyroidism: Graber, E.; Regelmann, M.O.; Annunziato, R.; Machac, J.; Rapaport, R.

• Thyroid Function in Rett Syndrome: Stagi, S.; Cavalli, L.; Congiu, L.; Scusa, M.F.; Ferlini, A.; Bigoni, S.; Benincasa, A.; Rossi, B.; Pini, G.

Review of a Controversial Topic
• Down Syndrome and Nonautoimmune Hypothyroidisms in Neonates and Infants: Kariyawasam, D.; Carré, A.; Luton, D.; Polak, M.

New Insights from Clinical Experience
• Severe Unsuspected Maternal Hypothyroidism Discovered after the Diagnosis of Thyrotropin Receptor-Blocking Antibody-Induced Congenital Hypothyroidism in the Neonate: Failure to Recognize and Implications to the Fetus: Brown, R.S.; Alter, C.A.; Sadegh-Nejad, A.
• Foetal Thyroid Dysfunction: Treat the Mother First!: Khater, C.; Ceccaldi, P.F.; Poulajade, O.; Banigé, M.; Ottenwalter, A.; Luton, D.

New Hypothesis
• Molecular Insights into the Possible Role of Kir4.1 and Kir5.1 in Thyroid Hormone Biosynthesis: Ramos, H.E.; Dias da Silva, M.R.; Carré, A.; Silva Jr., J.C.; Paninka, R.M.; Oliveira, T.L.; Tron, E.; Castanet, M.; Polak, M.

The European Thyroid Journal publishes papers reporting original research in basic, translational and clinical thyroidology. Original contributions cover all aspects of the field, from molecular and cellular biology to immunology and biochemistry, from physiology to pathology, and from pediatric to adult thyroid diseases with a special focus on thyroid cancer. Readers also benefit from reviews by noted experts, which highlight especially active areas of current research. The journal will further publish formal guidelines in the field, produced and endorsed by the European Thyroid Association.

Selected contributions

- 2013 European Thyroid Association Guidelines for Cervical Ultrasound Scan and Ultrasound-Guided Techniques in the Postoperative Management of Patients with Thyroid Cancer: Leenhardt, L. (Paris); Erdogan, M.F. (Ankara); Hegedus, L. (Odense); Mandel, S.J. (Philadelphia, Pa); Paschke, R. (Leipzig); Rago, T. (Pisa); Russ, G. (Paris)

- 2013 ETA Guideline: Management of Subclinical Hypothyroidism: Pearce, S.H.S. (Newcastle upon Tyne); Brabant, G. (Lübeck); Duntas, L.H. (Athens); Monzani, F. (Pisa); Peeters, R.P. (Rotterdam); Razvi, S. (Newcastle upon Tyne/Gateshead); Wemeau, J.-L. (Lille)

- Thyroid Hormone Actions in Cartilage and Bone: Williams, G.R. (London)

- Se- and S-Based Thiouracil and Methimazole Analogues Exert Different Inhibitory Mechanisms on Type 1 and Type 2 Deiodinases: Rijntjes, E.; Scholz, P.M. (Berlin); Mugesh, G. (Bangalore); Köhrle, J. (Berlin)

- Transaxillary Robotic Thyroid Surgery: A Preliminary European Experience: Lallemant, B. (Nîmes/Montpellier); Chambon, G. (Nîmes); Galy-Bernadou, C. (Nîmes/Montpellier); Chapuis, H.; Guedj, A.-M. (Nîmes); Pham, H.T.; Lallemant, J.-G.; Rupp, D. (Nîmes/Montpellier)

- Positive Cytology Findings and a Negative Histological Diagnosis of Papillary Thyroid Carcinoma in the Thyroid: Is It a False-Positive Cytology or a Disappearing Tumor? Jang, E.K.; Song, D.E.; Gong, G.; Baek, J.H.; Choi, Y.M.; Jeon, M.J.; Han, J.M.; Kim, W.G.; Kim, T.Y.; Shong, Y.K.; Kim, W.B. (Seoul)
