Karger Publishers – 125 Years of Experience in Medical and Scientific Publishing

Festschrift
Karger – Connecting the World of Biomedical Science
This richly illustrated Festschrift chronicles the company’s development and contributions in the service of medicine and science since 1890. It tells the history of Karger Publishers until the present day.

Please send an e-mail to 125years@karger.com to receive your free copy or discover it online.

HORMONE RESEARCH IN PÆDIATRICS

From Developmental Endocrinology to Clinical Research

Founded 1970 as 'Hormones' by M. Marois
Continued by J. Girard (1976–1995); M.B. Ranke (1996–2003);
F. Czernichow (2004–2013)

Editor-in-Chief
S. Cianfarani, Rome

Associate Editors
S.F. Ahmed, Glasgow
A. Belgorosky, Buenos Aires
M.T. Dattani, London
O. Hiort, Lübeck
L. Ibañez, Barcelona
P.-E. Mullis, Bern
M. Phillip, Petah Tikva
M. Polak, Paris
P. Saenger, New York, N.Y.
O. Söder, Stockholm
R.J. Voutilainen, Kuopio
J.M. Wit, Leiden

Editorial Board
I.J.P. Arnhold, São Paulo
A. Bereket, Istanbul
J.-P. Bourguignon, Liège
J.-C. Carel, Paris
F. Cassorla, Santiago
J.-P. Chanoine, Vancouver, B.C.

HORMONE RESEARCH IN PAEDIATRICS

Aim and Scope
Hormone Research in Paediatrics aims to provide rapid publication of clinical investigations, mini reviews and novel insights from clinical experience, as well as experimental and methodological work related to paediatric and adolescent endocrinology. Correspondence is welcome, but publication of letters is at the discretion of the editors.

Submission
Manuscripts written in English should be submitted using the online submission website at:
www.karger.com/hrp
Should you have any problems with your submission, please contact the Editorial Office:
hrp@karger.com
Prof. S. Cianfarani
S. Karger AG
Editorial Office ‘Hormone Research in Paediatrics’
P.O. Box
CH–4009 Basel (Switzerland)
Tel. +41 61 306 1437
Fax +41 61 306 1434

They should be accompanied by a signed copyright transfer statement (please see submission website). The names and addresses of four experts in the appropriate area of research should accompany each manuscript. Selected scientist(s) will be invited to act as referee(s).

Main Sections
1. Original papers
Any original papers on hormone research are accepted; we particularly welcome papers on developmental and clinical research.

2. Mini reviews
Most mini reviews are submitted upon invitation. However, the editors are open to unsolicited mini reviews. Authors planning such a mini review are requested to contact the Editorial Office with an outline of the intended mini review. All mini reviews are subject to peer review. The guidelines for the mini reviews can be found at www.karger.com/hrp_guidelines#11.

3. Novel insights from clinical practice
We invite contributions to this section that provide novel insight into a clinical problem. We recognise the value of case reports and thus submissions can be based around a case or a number of similar cases. The most important aspect of the presentation is that it should provide a new perspective on a recognised clinical scenario or may represent an entirely new clinical condition. The novel aspects of the case(s) may be in the phenotype, the presentation, the investigation and/or the management. Manuscripts revealing novel mechanisms are of particular interest. Papers repeating known phenotypes or mutations in a novel context are not acceptable. We propose that a highlighted box containing one or two bullet points on ‘Established facts’ and ‘Novel insights’ be placed on the first page of the report. This reinforce the novelty of the clinical observation. The manuscript should be presented with an abstract (up to 200 words), brief introduction, case or case series description and results, followed by a discussion. No limits on length or number of references are imposed. Statements for the highlighted box should also be included.

Conditions
All manuscripts are subject to editorial review. The names and addresses of six experts in the appropriate area of research should accompany each manuscript. Selected scientist(s) will be invited to act as referee(s). Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Hormone Research in Paediatrics and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Arrangement
Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Each paper needs an abstract of up to 200 words. It should be structured as follows:

Background/Aims: What is the major problem that prompted the study?

Methods: How was the study done?

Results: Most important findings?

Conclusion: Most important conclusion?

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures, a legend, also prepared on a separate page. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 × 223 mm) or provide crop marks.

Color illustrations
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

References: In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples

(b) Papers published only with DOI numbers: Theoharides TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be used in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material
Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author’s Choice™
Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research
The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication.
Endocrine Development

Communicating scientific advances in a clinical context

This series is devoted to specific areas of fetal, neonatal, pediatric and adolescent endocrinology. It addresses a wide range of relevant issues in the context of a well defined subject and covers new areas of clinical and basic research. Clear evidence-based guidelines on clinical management by highly qualified basic and clinical scientists who present their clinically relevant recent findings are also provided. Bringing together experts from related disciplines such as fetal and perinatal medicine, epidemiology, public health, molecular endocrinology, the volumes cover a broad spectrum in endocrine development.

Endocrine Development

Vol. 25: The Ghrelin System
Editors: Benso, A. (Turin); Casanueva, F.F. (Santiago de Compostela); Ghigo, E.; Granata, R. (Turin)

Pointing in new directions in obesity research and clinical care

Metabolic Syndrome and Obesity in Childhood and Adolescence

Editors
Wieland Kiess
Martin Wabitsch
Claudio Maffeis
Arya M. Sharma

Despite the fact that the prevalence of obesity in early childhood has been stable and is no longer increasing in many developed and industrialized countries, the incidence of both obesity and full-blown metabolic syndrome in children and adolescents is still very high. Obesity is a major disease burden in all societies and needs to be prevented early in life. New approaches are eagerly sought and absolutely necessary. This book presents a comprehensive and state-of-the-art summary of current and new knowledge in this critical field. Crucial issues such as nutrition and genetics are described in detail. In addition, new ideas such as e-health and the consequences of urban living conditions are explored. Last but not least, modern treatment concepts and prevention even at an early age are competently discussed. Offering a valuable update on new developments in obesity research and the treatment in children and adolescents, this book is essential reading for all pediatricians and health-care professionals who look after young patients on a regular basis.

Contents
- Preface: Kiess, W.; Wabitsch, M.; Maffeis, C.; Sharma, A.M.
- Definitions and Clinical Aspects
  - Definitions: Wabitsch, M.; Körner, A.
- Causes
  - Genetics of Obesity in Childhood and Adolescence: Böttcher, Y.; Kovacs, P.
  - Orthopaedic Aspects of Obesity in Children and Adults: Thielemann, F.; Guenther, K.-P.; Stiehler, M.
- Consequences
  - Carbohydrate Metabolism: Wabitsch, M.; Denzer, C.
  - Urogenital Complications: Renal Disease, Urolithiasis and Lower Urinary Tract Symptoms: Morandi, A.; Maffeis, C.
- Societal Aspects and Prevention
  - Urban Living Conditions: The Relation between Neighborhood Characteristics and Obesity in Children and Adolescents: Igel, U.; Grande, G.
  - Science and Politics: Lustig, R.H.
  - An Economic Perspective on Childhood Obesity: Teuner, C.M.; John, J.; Wolfenstetter, S.B.; Holle, R.
  - Prevention of Childhood and Adolescent Obesity and its Barriers: Markert, J.
  - E-Health in Overweight and Obesity Prevention: Herget, S.
- Obesity Management
  - Obesity Treatment Programmes: Reinehr, T.

Yearbook of Pediatric Endocrinology 2014

Editors
Ken Ong
Ze’ev Hochberg

The body of knowledge in most medical specialties is rapidly expanding, making it virtually impossible to follow all advances in clinical and basic sciences that are relevant to a given field. This is particularly true in pediatric endocrinology, at the cross-road of pediatrics, endocrinology, development and genetics.

Providing abstracts of articles that report the year’s breakthrough developments in the basic sciences and evidence-based new knowledge in clinical research and clinical practice that are relevant to the field, the Yearbook of Pediatric Endocrinology keeps busy clinicians and scientists, pediatric endocrinologists, and also pediatricians and endocrinologists informed on new advances.

Twelve Associate Editors and their co-authors selected from several thousand papers those that brought the most meaningful new information, summarized them and provided comments to put them into perspective. The papers are classified into those that identify new genes involved in diseases, new hormones, concepts revised or re-centered, important observations for clinical practice, large-scale clinical trials, new mechanisms, new paradigms, important review articles, new fears and new hopes.

Because the Yearbook is endorsed by the European Society for Paediatric Endocrinology (ESPE), its publication is linked to the annual meeting of the ESPE. The Yearbook of Pediatric Endocrinology 2014 covers the medical and scientific literature from June 2013 through May 2014.

Contents

- Preface
  Ze’ev Hochberg and Ken Ong

- Pituitary and Neuroendocrinology
  Evelien F. Gevers, Carles Gaston-Massuet and Nicolas de Roux

- Antenatal and Neonatal Endocrinology
  Khalid Hussain

- Thyroid
  Gabor Szinnai, Athanasia Stoupa, Aurore Carré, Mireille Castanet and Michel Polak

- Growth and Growth Factors
  Elena Inzago and Stefano Cianfarani

- Bone, Growth Plate and Mineral Metabolism
  Outi Mäkitie, Agnès Linglart and Terhi J. Heino

- Reproductive Endocrinology
  Lena Sahlin and Olle Soder

- Adrenals
  Erica L.T. van den Akker and Evangelia Chamarandi

- Oncology and Chronic Disease
  Thomas M.K. Volkl, Tilman Rohrer and Helmuth G. Dorr

- Type 1 Diabetes: Clinical and Experimental
  M. Loredana Marcovecchio and Francesco Chiarelli

- Obesity and Weight Regulation
  Martin Wabitsch, Daniel Tews, Christian Denzer, Anja Moss, Stephanie Brandt, Belinda Lennerz and Pamela Fischer-Posovszky

- Type 2 Diabetes, Metabolic Syndrome and Lipid Metabolism
  Orit Pinhas-Hamiel

- Evidence-Based Medicine in Pediatric Endocrinology
  Roderick T. Mitchell, Kathryn J. Noyes, Tarini Chetty and Christopher J.H. Kelnar

- Science and Medicine
  Ze’ev Hochberg and Ken Ong

- Editors’ Choice
  Ken Ong and Ze’ev Hochberg

The easiest way to order: www.karger.com /ybpey
Recent discoveries in experimental and clinical research have led to impressive advances in our knowledge of the genetic and environmental mechanisms governing sex determination and differentiation, their evolution as well as the mutations or endocrine and metabolic abnormalities that interfere with normal gonadal development. Sexual Development provides a unique forum for this rapidly expanding field. Its broad scope covers all aspects of genetics, molecular biology, embryology, endocrinology, evolution and pathology of sex determination and differentiation in humans and animals. It publishes high-quality original research manuscripts, review articles, short reports, case reports and commentaries. An internationally renowned and multidisciplinary editorial team of three chief editors, ten prominent scientists serving as section editors, and a distinguished panel of editorial board members ensures fast and author-friendly editorial processing and peer reviewing.

Sexual Development

Genetics, Molecular Biology, Evolution, Endocrinology, Embryology, and Pathology of Sex Determination and Differentiation

Selected contributions

- Novel PCR Assay for Determining the Genetic Sex of Mice: McFarlane, L.; Truong, V.; Palmer, J.S.; Wilhelm, D. (Brisbane, Qld.)
- New Genetic Abnormalities in Non-21α-Hydroxylase-Deficiency Congenital Adrenal Hyperplasia: Martin, M.; Najera, N.; Garibay, N.; Malanico, L.M.; Martinez, T.; Rivera, J.; Rivera, M.; Queipo, G. (Mexico City)
- Variable Loss of Functional Activities of Androgen Receptor Mutants in Patients with Androgen Insensitivity Syndrome: Elfferich, P.; van Rooyen, M.E.; de Vrijene, D.; Trapman, J.; Drop, S.L.S.; van den Akker, E.L.T. (Rotterdam); Lusher, S.J. (Amsterdam); Bosch, R. (Dusseldorf); Bunch, T.; Hughes, I.A. (Cambridge); Houtsmuller, A.B. (Rotterdam); Cools, M. (Ghent); Faradz, S.M.H. (Semarang); Bisschop, P.H.; Bunch, M.C.M. (Amsterdam); Oostdijk, W.; (Leiden); Brüggenwirth, H.T.; Brinkmann, A.O. (Rotterdam)
- Insights into the Evolutionary History of the Y-Linked Sex Reversal Mutation in Mus minutoides: Clues from Sequence Analyses of the Y-Linked Sry Gene: Veyrunes, F.; Perez, J. (Montpellier); Fichet-Calvet, E. (Hamburg); Britton-Davidian, J. (Montpellier)
- Follistatin Is an Early Player in Rainbow Trout Ovarian Differentiation and Is Both Co-localized with Aromatase and Regulated by the Wnt Pathway: Nicol, B.; Yano, A.; Guérin, A.; Fostier, A. (Rennes)
- Sex Determination in Insects: Variations on a Common Theme: Bopp, D. (Zurich); Saccone, G. (Naples); Beye, M. (Dusseldorf)
