Festschrift
Karger – Connecting the World of Biomedical Science
This richly illustrated Festschrift chronicles the company’s development and contributions in the service of medicine and science since 1890. It tells the history of Karger Publishers until the present day.

Please send an e-mail to 125years@karger.com to receive your free copy or discover it online.

Karger Gazette
The Karger Gazette anniversary issue explores the STM publishing business in the digital age, offers short portraits of Karger’s journal and book series editors as well as interviews with three renowned scientists.
www.karger.com/gazette
Submission

Manuscripts written in English should be submitted using the online submission website at:

www.karger.com/aha

If you experience any problems with your submission, please contact:

ah@karger.com

Prof. I. Ben-Bassat
S. KARGER AG
Editorial Office ‘Acta Haematologica’
PO Box
CH–4009 Basel (Switzerland)

All manuscripts must be accompanied by a covering letter signed by all authors. Assurance should be given that the manuscript is not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Acta Haematologica and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Conditions

All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Acta Haematologica and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Arrangement

Recommendation for Usage of Units and Abbreviations:
The standard abbreviations used for measurements of weight, length, volume, and time (i.e. mg, cm, ml, min) are used without definition. The abbreviations listed on the opposite page also require no definition. Please note that punctuation is not needed. The usage of units as recommended in the table on the opposite page is required. When listed the alternative units can be used.

Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Each paper needs an abstract of a maximum of 200 words.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate sheets. Tables require a heading and figures a legend, also prepared on a separate sheet. For the reproduction of illustrations, only good drawings and original photographs can be accepted; negatives or photocopies cannot be used. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 × 223 mm) or provide crop marks. On the back of each illustration, indicate its number, the author’s name, and “top” with a soft pencil. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations:

Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

References: In the text identify references by Arabic numerals [in square brackets]. Submission for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Please cite all authors, ‘et al’ is not sufficient. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples

Rapid Communication

Manuscripts intended for rapid communication must present new findings of sufficient importance to justify their accelerated acceptance. They should follow the general arrangement of research papers except that the separate sections should not be formally titled. They should not be more than three pages in length (including figures, tables and references). Proofs are checked by the Main Editor and not sent to the authors. Review will be rapid, and once accepted, the paper will be included in the next planned issue. If manuscripts are to undergo significant change after editing they will be treated as brief communications and returned to the authors for correction.

Brief Communication

The general arrangement for brief communications is the same as for research papers except that the manuscript is not divided into separate sections formally entitled introduction, methods, results, discussion. No abstract is required. These should not be more than 3 pages in length.

Letter to the Editor

Comments and responses to previously published articles and other short correspondences are welcome. They should be limited to 1 or 1½ manuscript pages with a general arrangement as specified for Brief Communications.

Digital Object Identifier (DOI)

S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Supplementary Material

Supplementary material is restricted to additional data (i.e. data which are necessary for the scientific integrity and conclusions of the paper). Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author’s Choice™

Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/author’s_choice.

NIH-Funded Research

The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author’s Choice™ service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo.

More details on NIH’s Public Access Policy are available at http://publicaccess.nih.gov/FAQ.htm#a1

Self-Archiving

Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copy-editing and design improvements as well as citation links.

Guidelines for Authors

Page Charges
Authors are charged CHF 160.00 per printed page for the first 6 pages and CHF 325.00 for each additional page, including tables, illustrations, and references. 1 printed page is equal to approximately 3 manuscript pages.

Usage of Units and Abbreviations

Proofs
Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations made in proofs, other than the correction of printer’s errors, are charged to the author.

Reprints
Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

A new vision to understanding medicine

Handbook of Clinical Gender Medicine

Editors: Karin Schenck-Gustafsson (Stockholm), Paula R. DeCola, Donald W. Pfaff (New York, N.Y.), David S. Pitsky (Durham N.C.)

In well-referenced chapters, experts cogently and concisely explain how the incorporation of gender issues into research can affect the medical understanding and treatment of heart disease, osteoporosis, arthritis, pain as well as malaria among other conditions. This intriguing and unique medical textbook provides readers with a valuable new perspective on how to incorporate gender issues into the different branches of medicine.

2nd Congress on Controversies in Thrombosis & Hemostasis

Barcelona, Spain • November 5-7, 2015

Abstract Submission Deadline: June 30, 2015

Preliminary Program

Thrombotic Disorders and Anti-Thrombotics
- Screening and treating thrombophilia
- New oral anticoagulant for the treatment of venous thromboembolism and atrial fibrillation
- Antiplatelet treatment and monitoring
- Pharmacogenomics, immune thrombocytopenic purpura and thrombolytic therapy
- Prevention of venous thromboembolism and coronary artery disease
- Antithrombotics for patient subgroups

Pediatrics
- Thrombosis - arterial and venous
- Venous thromboembolism and activated
- Hemophilia and bleeding in children

Bleeding and Cancer Related Disorders
- Hemophilia and factor XI deficiency
- Cancer bleeding and thrombosis
- Acquired coagulopathies

‘A collection of extraordinary essays’

GOTTFRIED SCHATZ

A MATTER OF WONDER

What Biology Reveals about Us, Our World, and Our Dreams

Where do we come from? Is our destiny determined by the genes we inherit? In this book Gottfried Schatz, the world-renowned biochemist and co-discoverer of mitochondrial DNA, gives lucid – albeit often surprising – answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines. With passion and a keen sense of wonder he draws on philosophy, cultural history and art to formulate his reflections on the mysteries of life. His essays will appeal not only to scientists but to all inquisitive minds, regardless of educational and professional background.

G. Schatz (Basel)
A Matter of Wonder
What Biology Reveals about Us, Our World, and Our Dreams
