Karger Publishers – 125 Years of Experience in Medical and Scientific Publishing

Karger Publishers – independent, family-run and Swiss-based.

It is our goal to serve the global scientific community with innovative and outstanding publications in all fields of medical science. This means dedication to maintaining the highest standards of quality, as well as personalized service for authors, editors and readers.

Aims and Scope

Practical information on hemodialysis, hemofiltration, peritoneal dialysis and plasma filtration is featured in this journal. Recognizing the critical importance of equipment and procedures, particular emphasis has been placed on reports, drawn from a wide range of fields, describing technical advances and improvements in methodology. Papers reflect the search for cost-effective solutions which increase not only patient survival but also comfort through prevention or correction of undesirable effects. Advances in vascular access and blood anticoagulation, problems associated with exposure of blood to foreign surfaces and acute-care nephrology, including continuous therapies, also receive attention. Nephrologists, internists, intensivists and hospital staff involved in dialysis, apheresis and immunoadsorption for acute and chronic solid organ failure will find this journal useful and informative.

Submission

Manuscripts written in English are considered and should be submitted online at www.karger.com/bpu

Should you experience problems with your submission, please contact

Editorial Office ‘Blood Purification’
S. Karger AG
PO Box 4009
CH-4009 Basel (Switzerland)
Tel. +41 61 306 1356
Fax +41 61 306 1434
E-Mail bpu@karger.com

Conditions

All manuscripts are subject to editorial review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of the publisher. It is the author’s responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Conflicts of Interest

Authors are required to disclose any sponsorship or funding arrangements relating to their research and all authors should disclose any possible conflicts of interest. Conflict of interest statements will be published at the end of the article.

Ethics

Published research must comply with the guidelines for human studies and animal welfare regulations. Authors should state that subjects have given their informed consent and that the study protocol has been approved by the institute’s committee on human research. Further, they should also state that animal experiments conform to institutional standards.

Categories of Manuscripts

(Word limits include tables, illustrations and references)

- Original Papers are full-length research papers which will be considered for the journal. Articles cover topics relevant to blood cleansing studies (max. 2,500 words).
- In-Depth Reviews are comprehensive, state-of-the-art papers (systematic reviews or meta-analyses) on important clinical problems of hemodialysis, hemofiltration, peritoneal dialysis and plasma filtration. In-Depth Reviews may be invited by the Editor or they may be unsolicited (max. 5,000 words), although in the latter, we ask the author to send the Editor a short outline first (300–400 words) to ensure that a review on a similar subject has not already been commissioned. Manuscripts will be assessed in-house and those rated suitable will be peer-reviewed before an editorial decision is made.
- Editorials are usually invited by the Editor (max. 1,000 words). Please send suggestions to the Editor.
- Methods in Blood Purification papers dealing with methodological issues in blood purification studies (e.g., recruitment, exclusion and inclusion criteria, methodological evaluation, novel approaches to clinical trials, statistical analyses and follow-up problems and solutions), particularly with regard to on-going, large population-based studies, controlled clinical trials, cohort and case-control studies are welcome (max. 5,000 words).
- Letters to the Editor and Opinions. Manuscripts of max. 500 words, 1 figure or table and max. 10 references are considered for publication provided they describe a novel observation or add pertinent new information.

Arrangement

Title page: The first page of each paper should indicate the title, the authors’ names, the institute where the work was conducted, and a short title for use as running head.

Full address: The exact postal address of the corresponding author complete with postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.

Key words: Please supply 3–10 key words in English that reflect the content of the paper.

Abstract: Each paper needs an abstract in English of not more than 150 words. It should be structured as follows:

Background/Aims: What is the major problem that prompted the study?

Methods: How was the study performed?

Results: Most important findings?

Conclusion: Most important conclusion?

Abstract of In-Depth Reviews: Should be divided into the following subsections: Background, Summary and Key Messages. The Background should provide a brief clinical context for the review and is followed by the Summary, which should include a concise description of the main topics covered in the text. The Key Messages encapsulate the main conclusions of the review.

Footnotes: Avoid footnotes.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. For the reproduction of illustrations, only good drawings and not sketches should be submitted. Due to technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations in one block for reproduction (max. size: 180 × 223 mm) or provide crop marks. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi.

Color illustrations

Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and figure legends.

Print edition: Up to 6 color illustrations per page can be integrated within the text at CHF 960.00 per page.

References: In the text identify references by Arabic numerals [in square brackets]. Material submitted for publication but not yet accepted should be noted as [unpublished data] and not be included in the reference list. The list of references should include only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The names of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples

(b) Papers published only with DOI numbers: Theoharis TC, Boucher W, Spear K; Serum interleukin-6 reflects disease severity and osteoporosis in mastocytosis patients. Int Arch Allergy Immunol DOI: 10.1159/000063858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)

S. Karger Publishers supports DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published.
Supplementary Material

Supplementary material is restricted to additional data that are not necessary for the scientific integrity and conclusions of the paper. Please note that all supplementary files will undergo editorial review and should be submitted together with the original manuscript. The Editors reserve the right to limit the scope and length of the supplementary material. Supplementary material must meet production quality standards for Web publication without the need for any modification or editing. In general, supplementary files should not exceed 10 Mb in size. All figures and tables should have titles and legends and all files should be supplied separately and named clearly. Acceptable files and formats are: Word or PDF files, Excel spreadsheets (only if the data cannot be converted properly to a PDF file), and video files (.mov, .avi, .mpeg).

Author’s Choice™

Karger’s Author’s Choice™ service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

NIH-Funded Research

The U.S. National Institutes of Health (NIH) mandates under the NIH Public Access Policy that final, peer-reviewed manuscripts appear in its digital database within 12 months of the official publication date. As a service to authors, Karger submits the final version of your article on your behalf to PubMed Central. For those selecting our premium Author’s Choice™ service, we will send your article immediately upon publishing, accelerating the accessibility of your work without the usual embargo. More details on NIH’s Public Access Policy is available at http://publicaccess.nih.gov/FAQ.htm#a1

Self-Archiving

Karger permits authors to archive their pre-prints (i.e. pre-refereeing) or post-prints (i.e. final draft post-refereeing) on their personal or institution’s servers, provided the following conditions are met: Articles may not be used for commercial purposes, must be linked to the publisher’s version, and must acknowledge the publisher’s copyright. Authors selecting Karger’s Author’s Choice™ feature, however, are also permitted to archive the final, published version of their article, which includes copyediting and design improvements as well as citation links.

Page Charges

There are no page charges for papers of 2 printed pages. Each additional complete or partial page will be charged to the author at a rate of CHF 325.00 per page.

Proofs

Unless indicated otherwise, proofs are sent to the corresponding author and should be returned with the least possible delay. Alterations made in proofs, other than the correction of printer’s errors, are charged to the author.

Reprints

Order forms and a price list are sent with the proofs. Orders submitted after the issue is printed are subject to considerably higher prices.
Disclaimer:

The 5th NIVAS Conference
Challenges and the future of IV therapy

Tuesday 9–Wednesday 10 June 2015
The Grand Hotel, Bristol

Techniques and products in infusion therapy and vascular access are continually changing and improving, so now more than ever there is a need for healthcare professionals from all disciplines across the UK to work towards a coordinated approach to practice. This conference will look at some of the challenges that face all those who are facilitating and delivering infusion therapy whether in the acute or community setting.

There will also be a focus on the future of infusion therapy and vascular access, with contributions from experts in this field. There will be plenty of opportunity to share practices, learn from each other and for delegates to present their work either through oral presentation or poster exhibition.

Keynote sessions include:
- Vascular access - a global and UK perspective
- Vessel health and preservation
- NICE guidelines and quality standard on IV fluid therapy in adults in hospital

Don’t delay, register online at www.nivas.org.uk

Take a guided tour through
125 years of medical and scientific publishing

This hand-picked selection represents the history of the publishing house and illustrates the development of medicine and its subspecialties:
www.karger.com/Publishing-Highlights

For over 40 years the Karger Gazette has been distributed to a growing audience worldwide. Published in newspaper format, it highlights advances in biomedicine and clinical practice, introduces personalities, portrays research institutes and chronicles milestones in the history of Karger Publishers in a lively and readable style.

The new anniversary issue celebrates Karger’s 125 years as a medical publisher. It explores the STM publishing business in the digital age, offers short portraits of Karger’s journal and book series editors, and includes interviews with three renowned scientists who talk about their careers and how they define progress.

Polymyxin B Hemoperfusion in Sepsis: Growing Body of Evidence and Occasional Conflicting Results
Antonelli, M. (Rome); Ronco, C. (Vicenza)

Papers and Abstracts

17th International Conference on Dialysis

Advances in Kidney Disease 2015
Kotanko, P.; Levin, N.W. (New York, N.Y.); Ronco, C. (Vicenza)
(available online only)

Original Papers

174 A Pharmacoeconomic Analysis of Phosphate Binders Cost-Effectiveness in the RISCAVID Study
Panichi, V. (Lido Camaiore); Rosati, A. (Lucca); Di Giorgio, A.; Scatena, A. (Lido Camaiore); Bigazzi, R. (Livorno); Grazi, G. (Pontedera); Migliori, M.; Paoletti, S. (Lido Camaiore); Manca Rizza, G. (Pontedera); Casani, A. (Massa); Sgambato, A.; Ruggeri, M. (Rome)

181 Citrate versus Acetate-Based Dialysate in On-Line Haemodiafiltration. A Prospective Cross-Over Study
Molina Nuñez, M.; de Alarcón, R.; Roca, S.; Álvarez, G.; Ros, M.S.; Jimeno, C.; Bucalo, L.; Villegas, I.; Garcia, M.A. (Murcia)

188 Iohexol Transmembrane Clearance during Modeled Continuous Renal Replacement Therapy
Yardman-Frank, J.M.; Mercier, R.-C.; Wong, C.S.; Vilay, A.M. (Albuquerque, N.M.)

193 Does the Obesity Survival Paradox of Dialysis Patients Differ with Age?
Calabia, J. (Girona); Arcos, E. (Barcelona); Carrero, J.J. (Stockholm); Comas, J. (Barcelona); Vallés, M. (Girona)

200 Biocompatibility Reduces Inflammation-Induced Apoptosis in Mesothelial Cells Exposed to Peritoneal Dialysis Fluid
Santamaría, B.; Ucer, A.C.; Benito-Martin, A. (Madrid); Vicent, M.J.; Orzáez, M. (Valencia); Celdrán, A.; Selgas, R.; Ruiz-Ortega, M.; Ortiz, A. (Madrid)

210 A Pilot Study of Selective Lipopolysaccharide Adsorption and Coupled Plasma Filtration and Adsorption in Adult Patients with Severe Sepsis
Yaroustovsky, M.; Abramyan, M.; Krotenko, N.; Popov, D.; Plyushch, M.; Rogalskaya, E. (Moscow)

218 Anti-Inflammatory Effect of White Wine in CKD Patients and Healthy Volunteers
Migliori, M.; Panichi, V. (Camaiore); de la Torre, R.; Fitó, M.; Covas, M. (Barcelona); Bertelli, A. (Milan); Muñoz-Aguayo, D. (Barcelona); Scatena, A. (Camaiore); Paoletti, S.; Ronco, C. (Vicenza)

224 The Relationship Between Hemodialysis Modality and Insulin Resistance in Non-Diabetic Hemodialysis Patients
Moon, S.J. (Incheon/Seoul); Lee, J.E. (Seoul); Kim, J.-K. (Anyang); Yoon, S.Y. (Incheon); Kang, S.W.; Choi, K.H.; Ha, S.K.; Park, H.-C. (Seoul)

239 Effects of Hemoadsorption with a Novel Adsorbent on Sepsis: In vivo and in vitro Study
Zhang, J. (Pittsburgh, Pa./Jinan); Peng, Z.; Maberry, D.; Volpe, J.; Kimmel, J.D.; Federspiel, W.J. (Pittsburgh, Pa.); Kellum, J.A. (Pittsburgh, Pa./Jinan)

246 Initiation of Renal Replacement Therapy in the Intensive Care Unit in Vicenza (IRRIV) Score
Zaragoza, J.J. (Vicenza/México City); Villa, G.; Garzotto, F.; Sharma, A.; Lorenzin, A.; Ribeiro, E.; Lu, R. (Vicenza); Bellomo, R. (Heidelberg, Vic.); Ronco, C. (Vicenza); NEFROINT investigators
