Using and Understanding Medical Statistics
5th, revised and extended edition

The fifth revised edition of this highly successful book presents the most extensive enhancement since Using and Understanding Medical Statistics was first published 30 years ago. Without question, the single greatest change has been the inclusion of source code, together with selected output, for the award-winning, open-source, statistical package known as R. This innovation has enabled the authors to de-emphasize formulae and calculations, and let software do all of the ‘heavy lifting’.

This edition also introduces readers to several graphical statistical tools, such as Q-Q plots to check normality, residual plots for multiple regression models, funnel plots to detect publication bias in a meta-analysis, and Bland-Altman plots for assessing agreement in clinical measurements. New examples that better serve the expository goals have been added to a half-dozen chapters. In addition, there are new sections describing exact confidence bands for the Kaplan-Meier estimator, as well as negative binomial and zero-inflated Poisson regression models for over-dispersed count data.

The end result is not only an excellent introduction to medical statistics, but also an invaluable reference for every discerning reader of medical research literature.

Contents
Preface to the Fifth Edition
Prefaces to the Previous Editions
• Basic Concepts
• Tests of Significance
• Fisher’s Test for 2 × 2 Contingency Tables
• Approximate Significance Tests for Contingency Tables
• Some Warnings concerning 2 × 2 Tables
• Kaplan-Meier or ‘Actuarial’ Survival Curves
• The Log-Rank or Mantel-Haenszel Test for Comparing Survival Curves
• An Introduction to the Normal Distribution
• Analyzing Normally Distributed Data
• Linear Regression Models for Medical Data
• Binary Logistic Regression
• Regression Models for Count Data
• Proportional Hazards Regression
• The Analysis of Longitudinal Data
• Analysis of Variance
• Data Analysis
• The Question of Sample Size
• The Design of Clinical Trials
• Further Comments regarding Clinical Trials
• Meta-Analysis
• Epidemiological Applications
• Diagnostic Tests
• Agreement and Reliability

GUIDELINES FOR AUTHORS

Submission
Manuscripts written in English should be submitted using the online submission website at:
www.karger.com/uin
or as e-mail attachment (the preferred word-processing package is MS Word) to the Editorial Office:
uin@karger.ch
S. Karger AG
Editorial Office 'Urologia Internationalis'
P.O. Box
CH-4009 Basel (Switzerland)
Tel. +41 61 306 1424
Fax +41 61 306 1434

The manuscripts should be accompanied by a signed cover letter addressing the points below. A signed copyright transfer statement is required upon acceptance (please see submission website).

Conditions
All manuscripts are subject to peer review. Manuscripts are received with the explicit understanding that they are not under simultaneous consideration by any other publication. Submission of an article for publication implies the transfer of the copyright from the author to the publisher upon acceptance. Accepted papers become the permanent property of Urologia Internationalis and may not be reproduced by any means, in whole or in part, without the written consent of the publisher. It is the author's responsibility to obtain permission to reproduce illustrations, tables, etc. from other publications.

Cover Letter
It must include statements on the following points:
1. All authors have made a significant contribution to the findings and methods in the paper.
2. All authors have read and approved the final draft.
3. Financial or commercial interest must be acknowledged.
4. The work has not already been published and has not been submitted simultaneously to any other journal.
5. The corresponding author takes on the above responsibilities with his/her signature.

Plagiarism Policy
Whether intentional or not, plagiarism is a serious violation. We define plagiarism as a case in which a paper reproduces another work with at least 25% similarity and without citation. If evidence of plagiarism is found before/after acceptance or after publication of the paper, the author will be offered a chance for rebuttal. If the arguments are not found to be satisfactory, the manuscript will be retracted and the author sanctioned from publishing papers for a period to be determined by the responsible Editor(s).

Arrangement
Title page: The first page of each paper should indicate the title, the authors' names, the institute where the work was conducted.

In addition, the following should be put on the title page:
1. Short title for use as running head
2. A list of 3–10 key words for indexing purposes is essential
3. Corresponding author: One of the authors has to be indicated as the corresponding author. The full name and complete mailing address, e-mail address, as well as phone and fax numbers of that individual to whom correspondence, proofs, and requests for reprints should be addressed, must be given at the bottom of the title page.

Abstract: Each paper must have a structured abstract (Introduction, Materials and Methods, Results and Conclusions) of up to 20 lines (approximately 150 words). Abstracts of case reports need not be structured.

Footnotes: Avoid footnotes. When essential, they are numbered consecutively and typed at the foot of the appropriate page.

Tables and illustrations: Tables and illustrations (both numbered in Arabic numerals) should be prepared on separate pages. Tables require a heading and figures a legend, also prepared on a separate page. For technical reasons, figures with a screen background should not be submitted. When possible, group several illustrations on one block for reproduction (max. size 180 x 223 mm) or provide crop marks. Electronically submitted b/w half-tone and color illustrations must have a final resolution of 300 dpi after scaling, line drawings one of 800–1,200 dpi. Figure files must not be embedded in a document file but submitted separately (for detailed instructions, see http://www.karger.com/uin).

Case Reports should include the most important clinical details and not exceed 1,000 words. One table and two figures may be included. References should be limited to ten.

Letters to the Editor must include matters of interest to urologists and not exceed 500 words.

Color illustrations:
Online edition: Color illustrations are reproduced free of charge. In the print version, the illustrations are reproduced in black and white. Please avoid referring to the colors in the text and footnotes and do not exceed 1,000 words.

References:
In the text identify references by Arabic numerals. Please use only those publications which are cited in the text. Do not alphabetize; number references in the order in which they are first mentioned in the text. The surnames of the authors followed by initials should be given. There should be no punctuation other than a comma to separate the authors. Preferably, please cite all authors. Abbreviate journal names according to the Index Medicus system. Also see International Committee of Medical Journal Editors: Uniform requirements for manuscripts submitted to biomedical journals (www.icmje.org).

Examples:
(b) Papers published only with DOIs: Theoharis TC, Boucher W, Spear K: Serum interleukin-6 reflects disease severity and osteoporosis in mastoectomy patients. Int Arch Allergy Immunol DOI: 10.1159/000106858.

Reference Management Software: Use of EndNote is recommended for easy management and formatting of citations and reference lists.

Digital Object Identifier (DOI)
S. Karger Publishers support DOIs as unique identifiers for articles. A DOI number will be printed on the title page of each article. DOIs can be useful in the future for identifying and citing articles published online without volume or issue information. More information can be found at www.doi.org.

Self-Archiving/Green Open Access
Karger permits authors to archive their preprints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution’s internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or PubMed) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:
• Be used for noncommercial purposes only
• Be linked to the final version on www.karger.com
• Include the following statement:

‘This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogenet Genome Res 2014;142:227–238 (DOI: 10.1159/00036001)]. The final published version is available at http://www.karger.com/?doi=[insert DOI number].

It is the author’s responsibility to fulfill these requirements. For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. It is important to ensure that citations can be credited to the article.

Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karger on the author’s behalf [see Funding Organizations (NIH etc.)].

For self-archiving authors’ Choice166 (Gold Open Access) articles, see Author’s Choice166.

Author’s Choice
Karger’s Author’s Choice166 service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/ authors_choice.

The final, published version of the article may be posted at any time and in any repository or on other websites, in accordance with the relevant Creative Commons license. Reposted Open Access articles must:
• Follow the terms of the relevant Creative Commons license
• Be linked to the final version on www.karger.com
• Include the following statement:

‘The final, published version of this article is available at http://www.karger.com/?doi=[insert DOI number].’

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.
Funding Organizations (NIH etc.)
The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication. The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author’s Choice™, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders’ requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

Page Charges
There are no page charges for original papers of 3 or fewer printed pages (3,000 words including tables, illustrations and references) or for case reports with 2 or fewer printed pages. Each extra complete or partial page is charged to the author at CHF 325.00. The allotted size of a paper is equal to approx. 8 manuscript pages double-spaced (including tables, illustrations and references). The inability to pay charges for extra pages will not prejudice publication of the paper. This will be decided by the Editors.

Proofs
Pdf proofs will be sent to the corresponding author and should be returned with the least possible delay.

E-pub First
All articles are published electronically ahead of print with a DOI number and are supplemented later with the definite reference of the printed version. The articles become available immediately after the authors’ approval to publication, with the added advantage of being citable much earlier than in print. Authors can influence the time of appearance by promptly returning the proofs.

Reprints
Order form and price list is sent with the pdf proofs. Orders submitted after the issue is printed are subject to considerably higher prices.

'A collection of extraordinary essays'

GOTTFRIED SCHATZ
A MATTER OF WONDER

What Biology Reveals about Us, Our World, and Our Dreams

Where do we come from? Is our destiny determined by the genes we inherit? In this book Gottfried Schatz, the world-renowned biochemist and co-discoverer of mitochondrial DNA, gives lucid – albeit often surprising – answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines. With passion and a keen sense of wonder he draws on philosophy, cultural history and art to formulate his reflections on the mysteries of life. His essays will appeal not only to scientists but to all inquisitive minds, regardless of educational and professional background.

This journal covers the most active and promising areas of current research in gynecology and obstetrics. Invited, well-referenced reviews by noted experts keep readers in touch with the general framework and direction of international study. Original papers report selected experimental and clinical investigations in all fields related to gynecology, obstetrics and reproduction. Short communications are published to allow immediate discussion of new data. The international and interdisciplinary character of this periodical provides an avenue to less accessible sources and to worldwide research for investigators and practitioners.

Selected contributions
- Prediction of Gestational Diabetes Early in Pregnancy: Targeting the Long-Term Complications: Correa, P.J.; Vargas, J.F. (Santiago); Sen, S. (Boston, Mass.); Illanes, S.E. (Santiago)
- Perinatal Mortality and Advanced Maternal Age: Mutz-Dehbalaie, I. (Innsbruck); Scheier, M. (Innsbruck/Feldkirch); Jerabek-Klesl, S.; Brantner, C.; Windbichler, G.H.; Leitner, H.; Egle, D.; Ramoni, A. (Innsbruck)
- Ovarian Scanning and Aromatase Expression Long-Term Complications: Illanes, S.E. (Santiago); Sen, S. (Boston, Mass.); Mutz-Dehbalaie, I. (Innsbruck/Feldkirch); Scheier, M. (Innsbruck); Jerabek-Klesl, S.; Brantner, C.; Windbichler, G.H.; Leitner, H.; Egle, D.; Ramoni, A. (Innsbruck)
- Noninvasive Prenatal Diagnosis Using Next-Generation Sequencing: Xu, L.; Shi, R. (Shanghai)
- Fertility-Sparing Surgery in Ovarian Cancer Extended beyond the Ovaries: A Case Report and Review of the Literature: Petrillo, M., (Rome); Legge, F. (Campobasso); Ferrandina, G.; Monterisi, A.; Pedone Ancheta, L.; Scambia, G. (Rome)
- The Patient-Centeredness of Endometriosis Care and Targets for Improvement: A Systematic Review: Dancet, E.A.F. (Leuven/Amsterdam); Apers, S. (Leuven); Kremer, J.A.M.; Nelen, W.L.D.M. (Nijmegen); Sermeus, W.; D'Hoooghe, T.M. (Leuven)

Nephron comprises three sections, which are each under the editorship of internationally recognized leaders and served by specialized Associate Editors. Apart from high-quality original research, Nephron publishes invited reviews/minireviews on up-to-date topics. Papers undergo an innovative and transparent peer review process encompassing a Presentation Report which assesses and summarizes the presentation of the paper in an unbiased and standardized way.

The open access journal Nephron Extra provides additional contents based on reviewed and accepted submissions to the main journal Nephron on www.karger.com/nne.

Nephron
Founded: 1964
Category: Clinical and Basic Research
Field of Interest: Nephrology
Listed in bibliographic services, including Journal Citation Reports, PubMed/MEDLINE, Biological Abstracts, Embase, Amedeo

2016: Volumes 132, 133, 134
4 issues per volume
Language: English
ISSN 1660–8151
e-iSSN 2235–3186
