Using and Understanding Medical Statistics
5th, revised and extended edition

The fifth revised edition of this highly successful book presents the most extensive enhancement since Using and Understanding Medical Statistics was first published 30 years ago. Without question, the single greatest change has been the inclusion of source code, together with selected output, for the award-winning, open-source, statistical package known as R. This innovation has enabled the authors to de-emphasize formulae and calculations, and let software do all of the ‘heavy lifting’.

This edition also introduces readers to several graphical statistical tools, such as Q-Q plots to check normality, residual plots for multiple regression models, funnel plots to detect publication bias in a meta-analysis and Bland-Altman plots for assessing agreement in clinical measurements. New examples that better serve the expository goals have been added to a half-dozen chapters. In addition, there are new sections describing exact confidence bands for the Kaplan-Meier estimator, as well as negative binomial and zero-inflated Poisson regression models for over-dispersed count data.

The end result is not only an excellent introduction to medical statistics, but also an invaluable reference for every discerning reader of medical research literature.

Contents
Preface to the Fifth Edition
Prefaces to the Previous Editions
• Basic Concepts
• Tests of Significance
• Fisher’s Test for 2×2 Contingency Tables
• Approximate Significance Tests for Contingency Tables
• Some Warnings concerning 2×2 Tables
• Kaplan-Meier or ‘Actuarial’ Survival Curves
• The Log-Rank or Mantel-Haenszel Test for Comparing Survival Curves
• An Introduction to the Normal Distribution
• Analyzing Normally Distributed Data
• Linear Regression Models for Medical Data
• Binary Logistic Regression
• Regression Models for Count Data
• Proportional Hazards Regression
• The Analysis of Longitudinal Data
• Analysis of Variance
• Data Analysis
• The Question of Sample Size
• The Design of Clinical Trials
• Further Comments regarding Clinical Trials
• Meta-Analysis
• Epidemiological Applications
• Diagnostic Tests
• Agreement and Reliability

Orders may be placed with any bookshop, subscription agency, directly with the publisher or through a Karger distributor.

Karger – Medical and Scientific Publishers
CH-4009 Basel, Switzerland
orders@karger.com, F +41 61 306 12 34
www.karger.com
Color Illustrations

Online edition: Color figures are reproduced free of charge. In the print version, the figures are reproduced in black and white. Reprinting colors in the text and figure legends should be avoided.

Print edition: Up to 6 color figures per page can be integrated within the text at CHF 960.00 per page.

References

Identify references in the text using Arabic numerals (in square brackets). Do not alphabetize; number references sequentially in the order cited in the text. Material submitted for publication but not yet accepted should be referred to as [unpublished data] and should not be included in the reference list. The reference list should include only those publications which are cited in the text. Authors' surnames should be followed by their initials with no punctuation (e.g. Coste-Pinto FA, Basso AS). The first author's surname should be followed by et al (if not possible include at least 3 authors followed by et al). Abbreviate journal names according to the list of journals indexed for MEDLINE on the NLM website. Also see International Committee of Medical Editors: Uniform Requirements for Manuscripts Submitted to Biomedical Journals (http://www.ICMJE.org).

Examples

Reference Management Software: The use of EndNote is recommended to facilitate formatting of citations and reference lists. The journal output style can be downloaded from http://endnote.com/downloads/styles.

Supplementary Material and Multimedia Files

Multimedia files and other supplementary files, directly relevant but not essential to the conclusions of a paper, enhance the online version of a publication and increase its visibility on the web. These files will undergo editorial review. The Editors reserve the right to limit the scope and length of the supplementary material. Multimedia and supplementary material should meet production quality standards for publication without the need for any modification or editing. Files should not exceed 10 MB in size. Figures and tables need to have titles and legends, and all files should be supplied separately and labeled clearly. All supplementary material should be referred to in the main text. A DOI number will be assigned to supplementary material and it will be hosted online at https://karger.figshare.com under a CC BY license. Authors will be charged a processing fee of CHF 250.00 for supplementary material.

English Language Editing

For authors whose native language is not English, use of a professional language editing service prior to submission can help to avoid delays with the review process.

Digital Object Identifier (DOI)

A DOI number will be available as a unique identifier on the title page of each article. DOIs are useful for identifying and citing articles published online without volume or issue information (for more information, see www.doi.org).

Self-Archiving/Green Open Access

Karger permits authors to archive their pre-prints (i.e. pre-peer review) or post-prints (i.e. accepted manuscript after peer review but before production) on their personal or their institution’s internal website. In addition, authors may post their accepted manuscripts in public Open Access repositories and scientific networks (e.g. ResearchGate or Mendele) no earlier than 12 months following publication of the final version of their article. For all self-archiving, the posted manuscripts must:

- Be used for noncommercial purposes only
- Be linked to the final version on www.karger.com
- Include the following statement: ‘This is the peer-reviewed but unedited manuscript version of the following article: [insert full citation, e.g. Cytogenet Genome Res 2014;142:227–238 (DOI: 10.1159/000361001)]. The final, published version is available at http://www.karger.com/doi-9 [insert DOI number].’

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article. Manuscripts to be archived in PubMed Central due to funding requirements will be submitted by Karger on the author’s behalf (see Funding Organizations (NIH etc.)).

For self-archiving Author’s Choice (Gold Open Access) articles, see Author’s Choice.

Author’s Choice

Karger’s Author’s Choice service broadens the reach of your article and gives all users worldwide free and full access for reading, downloading and printing at www.karger.com. The option is available for a one-time fee of CHF 3,000.00, which is a permissible cost in grant allocation. More information can be found at www.karger.com/authors_choice.

The final, published version of the article may be posted at any time and in any repository or on other websites, in accordance with the relevant Creative Commons license. Reposted Open Access articles must:

- Follow the terms of the relevant Creative Commons license
- Be linked to the final version on www.karger.com
- Include the following statement: ‘The final, published version of this article is available at http://www.karger.com/doi-9 [insert DOI number].’

It is the author’s responsibility to fulfill these requirements.

For papers published online first with a DOI number only, full citation details must be added as soon as the paper is published in its final version. This is important to ensure that citations can be credited to the article.

Funding Organizations (NIH etc.)

The U.S. National Institutes of Health (NIH) Public Access Policy mandates that accepted, peer-reviewed manuscripts are archived in its digital database, PubMed Central (PMC), within 12 months of the official publication date. As a service to authors, Karger submits NIH-funded articles to PMC on behalf of the authors immediately upon publication. The NIH assigns a PMCID within approximately 1 month and the manuscript will appear in PMC after a 12-month embargo. For authors making their paper Open Access through Author’s Choice, the embargo will be overridden, thereby accelerating the accessibility of the article. Karger also complies with other funders’ requirements (including Wellcome Trust and RCUK) for submission to PMC. Authors should include information on their grants in the Acknowledgements section of their papers.

Copy Editing

Manuscripts accepted for publication by Karger Publishers are subject to copy editing.

Proofs

An email containing a link to download the proofs will be sent to the corresponding author. Proofs should be returned within 48 hours. Alterations made in proofs, other than the correction of printer’s (introduced) errors, are charged to the author and may require editorial approval.

Page Charges

There is no page charge for papers of 3 or fewer printed pages (including tables, illustrations and references). Authors are charged CHF 325.00 for each additional complete or partial printed page.

Reprints

An order form with a price list can be requested when returning the corrected proofs. Orders submitted after the issue is printed are subject to considerably higher prices.
Disclaimer: The statements, opinions and data contained in this publication are solely those of the individual authors and contributors and not of the publisher and the editor(s). The appearance of advertisements and product information, in any form or by any means, electronic or mechanical, including photocopying, recording, or microcopying, or by any information storage and retrieval system, without the written permission of the publisher or, in the case of photocopying, direct payment of a specified fee to the Copyright Clearance Center, is not a warranty, endorsement, or approval of the products or services advertised or of their effectiveness, quality or safety. PTS50 - The Prokaryotic Phosphoenolpyruvate: Sugar Phosphotransferase System

50 Years After Its Discovery

Editor
Milton H. Saier

A valuable update on the multifaceted functions of the PTS

Contents

Introduction
The Bacterial Phosphotransferase System: New Frontiers
50 Years After Its Discovery: Saier Jr., M.H.

Review Article
PTS50 Past, Present and Future, or Diauxie Revisited: Lengeler, J.W.

Research Articles
• PTS-Mediated Regulation of the Transcription Activator MtrR from Different Species: Surprising Differences Despite Strong Sequence Conservation: Joyet, P.; Derkaoui, M.; Bourouil, H.; Deutscher, J.
• Fucose-Mediated Transcriptional Activation of the fcs Operon by FcsR in Streptococcus pneumonia: Manzoor, I.; Shafeeq, S.; Afzal, M.; Kuipers, O.P.

Review Article
• The Phosphotransferase System in Solventogenic Clostridia: Mitchell, W.J.
• A Search for Ribonucleic Antiterminator Sites in Bacterial Genomes: Not Only Antitermination? Gordon, N.; Rosenblum, R.; Nussbaum-Shochat, A.; Elahoo, E.; Amster-Choder, O.
• Regulation of the Utilization of Amino Sugars by Escherichia coli and Bacillus subtilis: Same Genes, Different Control: Plumbridge, J.
• Cross-Talk between the Canonical and the Nitrogen-Related Phosphotransferase Systems Modulates Synthesis of the KdpFABC Potassium Transporter in Escherichia coli: Lüttermann, D.; Göpel, Y.; Görke, B.
• Modeling the Interplay of Pseudomonas putida EraA with the Potassium Transporter KdpFABC: Wolf, S.; Pfüger-Grau, K.; Kremling, A.

Research Article

Review Article
• Control of Transposon-Mediated Directed Mutation by the Phosphotransferase System: Saier Jr., M.H.; Zhang, Z.

‘A collection of extraordinary essays’

GOTTFRIED SCHATZ

A MATTER OF WONDER

What Biology Reveals about Us, Our World, and Our Dreams

Where do we come from? Is our destiny determined by the genes we inherit? In this book Gottfried Schatz, the world-renowned biochemist and co-discoverer of mitochondrial DNA, gives lucid – albeit often surprising – answers to universal questions and takes the reader on a fascinating journey of discovery across the boundaries of scientific disciplines. With passion and a keen sense of wonder he draws on philosophy, cultural history and art to formulate his reflections on the mysteries of life. These essays on key issues in the natural sciences will appeal not only to scientists but to all inquisitive minds, regardless of educational and professional background.

Monographs in Virology

Compact and thorough reference volumes for virologists and non-virologists alike

A skilful selection of topics of exceptional importance and a panel of acknowledged experts as authors have ensured an outstanding reputation for this series. Each monograph, centered on an active area of virologic research, provides a critical evaluation of recent progress and a useful commentary on the direction of future research. Characterized by a consistently high standard of scholarship and clear presentation of content, volumes in this series have proved their enduring value as convenient reference tools for both virologists working in the field and scientists working in allied areas.

Vol. 28: Prophylaxis and Early Detection of HPV-Related Neoplasia
Editor: Pfister, H. (Cologne)
VIII + 140 p., 27 fig., 21 in color, 13 tab., 2012
CHF 119.00 / EUR 111.00 / USD 140.00

Vol. 27: Avian Influenza
Editors: Klenk, H.-D.; Matrosovich, M.N. (Marburg); Stech, J. (Greifswald)
VIII + 294 p., 35 fig., 16 in color, 12 tab., 2008
CHF 249.00 / EUR 233.00 / USD 293.00

Vol. 26: Herpes Zoster
Recent Aspects of Diagnosis and Control
Editors: Gross, G. (Rostock); Doerr, H.W. (Frankfurt)
X + 194 p., 52 fig., 24 in color, 18 tab., 2006
CHF 198.00 / EUR 185.00 / USD 230.00

Vol. 25: Models of Viral Hepatitis
Editors: von Weizsäcker, F. (Freiburg); Roggenbuck, M. (Essen)
VIII + 164 p., 27 fig., 1 in color, 5 tab., 2005
CHF 162.00 / EUR 151.00 / USD 191.00

Contents

See the journal website for contents
Respiration brings together the results of both clinical and experimental investigations on all aspects of the respiratory system in health and disease. Clinical improvements in the diagnosis and treatment of chest and lung diseases are covered, as are the latest findings in physiology, biochemistry, pathology, immunology and pharmacology. The journal includes classic features such as editorials that accompany original articles in clinical and basic science research, reviews and letters to the editor. Further sections are: The Eye Catcher, What’s Your Diagnosis?, New Insights from Clinical Practice and Interventional Pulmonology in the journal. This modern mix of different features and a stringent peer-review process by a dedicated editorial board make Respiration a complete guide to progress in thoracic medicine.

Respiration
Founded: 1944
Category: Clinical Research
Field of Interest: Respiratory System
Listed in bibliographic services, including Journal Citation Reports, PubMed/MEDLINE, Embase, Amuedo
2016: Volumes 91, 92
6 issues per volume
Language: English
ISSN 0025–7931
e-ISSN 1423–0356
Impact Factor: 2.593

Selected contributions
• Principles of Rehabilitation and Reactivation: Interstitial Lung Disease, Sarcoidosis and Rheumatoid Disease with Respiratory Involvement: Holland, A.E.; Downman, L.M.; Hill, C.J. (Melbourne, Vic.)
• Decline in Asthma Prevalence and Severity in Israel over a 10-Year Period: Cohen, S.; Berkman, N.; Avital, A.; Springer, C.; Kordoba, L.; Haklai, Z. (Jerusalem); Eshel, A. (Tel Aviv); Goldberg, S.; Picard, E. (Jerusalem)
• Guideline for the Acquisition and Preparation of Conventional and Endobronchial Ultrasound-Guided Transbronchial Needle Aspiration Specimens for the Diagnosis and Molecular Testing of Patients with Known or Suspected Lung Cancer: van der Heijden, E.H.F.M. (Nijmegen); Casal, R.F. (Houston, Tex.); Trisolini, R. (Bologna); Steinfort, D.P. (Parkville, Vic.); Hwangbo, B. (Goyang); Nakajima, T. (Chiba); Goldhammer-Skov, B. (Copenhagen); Rossi, G. (Modena); Ferretti, M. (Ancona); Herth, F.F.J. (Heidelberg); Yung, R. (Baltimore, Md.); Krasnik, M. (Copenhagen) on behalf of the World Association for Bronchology and Interventional Pulmonology Task Force on Specimen Guidelines
• Exercise Training-Based Pulmonary Rehabilitation Program Is Clinically Beneficial for Idiopathic Pulmonary Fibrosis: Vainshelboim, B. (Petach Tikva/Porto); Oliveirina, J. (Porto); Yehoshua, L.; Weiss, I. (Petach Tikva); Fox, B.D.; Fruchter, O.; Kramer, M.R. (Petach Tikva/Tel Aviv)
• The Importance of Continuity in Inhaler Device Choice for Asthma and Chronic Obstructive Pulmonary Disease: Björner, L. (Lund)
• Aerosolized Antibiotics for Non-Cystic Fibrosis Bronchiectasis: Rubin, B.K.; Williams, R.W. (Richmond, Va.)
