Subject Index

Adolescence, growth spurt and injury 3
Anterior cruciate ligament rupture, basketball 44, 48, 51
Asthma, fatalities in sport 48

Baseball injury
  activity causes 16
  chronometry 17
  data sources 9, 10
  epidemiological research prospects 27, 28
  incidence of injury
    high school baseball 12
    pitching injuries 12–15
    studies 11
    youth baseball 10, 12
  location
    head, face, and torso 15
    lower extremity 16
    upper extremity 15, 16
  onset 15
  participation levels 9
  prevention suggestions
    batting helmets and face guards 24–26
    breakaway bases 26
    pitching limits 26, 27
    pitch types 27
    safety baseballs 26
    technique coaching 26
  risk factors
    extrinsic factors
      non-pitchers 22, 23
      pitchers 23, 24
    intrinsic factors
      non-pitchers 19
      pitchers 19, 21, 22
  severity
    catastrophic injury 18
    clinical outcome 18
    injury type 17, 18
    time loss 18

Basketball injury
  activity causes 43
  chronometry 43, 44
  data sources 33
  epidemiological research
    methodology 33, 34
    prospects 54, 58
  incidence
    age grouping 32
    emergency department survey 34, 38
    playing time and risks 38
  location
    lower extremities 38, 42
    upper extremities 42
  onset 38
  participation levels 31, 32
  prevention suggestions 54
  risk factors
    extrinsic factors 53
    intrinsic factors
      age and development 52
      miscellaneous factors 53
      psychological characteristics 52, 53
      sex 51, 52
severity
catastrophic injury 47, 48
clinical outcome 51
time loss 48–51
types of injuries 44–46
situational causes 42, 43

Cardiac sudden death, basketball 47, 51
Catastrophic injury
baseball 18
basketball 47, 48
gridiron football 73
ice hockey 102, 105, 106
rugby 132, 133
soccer 153, 157
Commotio cordis, baseball injury 18
Concussion
gridiron football 74
ice hockey 102
rugby 132
soccer 149

Death, see Fatalities

Elbow injury, baseball pitching 13–17
Epidemiology, overview of sports injury studies 5–7
Extrinsic risk factors, see Risk factors

Fatalities, see also Catastrophic injury
asthma in sport 48
gridiron football 73, 74
Football, see Gridiron football injury;
Rugby injury; Soccer injury

Gridiron football injury
chronometry 71
epidemiological research methodology 63, 64
prospects 82
incidence
high school football 64–67
offensive versus defensive players 69
youth football 67–69
location 69, 70
onset 69
participation levels 62, 63
prevention suggestions 79–82
risk factors
extrinsic factors
environment 78
equipment 79
training methods 78
intrinsic factors
dangerous activities 77, 78
physical 75, 76
psychosocial 76, 77
severity
catastrophic injury 73
concussion 74
fatalities 73, 74
grading 72
types of injury 72, 73
situational causes 70, 71
Growth plate injury, susceptibility in team sports 2, 3

Head injury
baseball 15
basketball 42, 48, 50
gridiron football 69, 73, 74
ice hockey 94, 97, 102, 105, 106
rugby 126, 127, 132
soccer 149
Hockey, see Ice hockey injury

Ice hockey injury
activity causes 97, 102
data sources 87, 88
epidemiological research prospects 115, 116
incidence 90–94
location 94–97
participation levels 86, 87
prevention suggestions
coaching, officiating, and rules 111–113
protective equipment 109–111
public awareness 113–115
rink demographics 111
surveillance of injury 113
risk factors 109
selection criteria for epidemiology studies 88–90

Subject Index
Ice hockey injury (continued)
severity
catastrophic injury 102, 105, 106
time loss 106, 109
types of injury 102
situational causes 97
Intrinsic risk factors, see Risk factors

Knee injury, soccer 149

Maturity status, chronological versus biological 4

Osteoarthritis, prevention 171

Pitchers, see Baseball injury

Posterior cruciate ligament rupture, basketball 44

Prevention of injury
baseball
battling helmets and face guards 24–26
breakaway bases 26
pitching limits 26, 27
pitch types 27
safety baseballs 26
technique coaching 26
basketball 54
gridiron football 79–82
ice hockey
coaching, officiating, and rules 111–113
protective equipment 109–111
public awareness 113–115
rink demographics 111
surveillance of injury 113
limitations of epidemiology studies 183–185
prospects for study 185, 186
quality of life effects 171
rugby injury 135, 136
soccer
physical capabilities 164, 165
preseason conditioning 164
shin guards 160, 164
study approach
randomized control trials 177–182
risk factor identification
modifiable risk factors 176, 177
nonmodifiable risk factors 173–176
overview 172, 173
strategy development and validation 177–183
surveillance for incidence estimation 172

Risk factors
baseball injury
extrinsic factors
non-pitchers 22, 23
pitchers 23, 24
intrinsic factors
non-pitchers 19
pitchers 19, 21, 22
basketball injury
extrinsic factors 53
intrinsic factors
age and development 52
miscellaneous factors 53
psychological characteristics 52, 53
sex 51, 52
gridiron football injury
extrinsic factors
environment 78
equipment 79
training methods 78
intrinsic factors
dangerous activities 77, 78
physical 75, 76
psychosocial 76, 77
ice hockey injury 109
identification
modifiable risk factors 176, 177
nonmodifiable risk factors 173–176
overview 172, 173
prevention suggestions
physical capabilities 164, 165
preseason conditioning 164
shin guards 160, 164
rugby injury
age 135
physical characteristics 135
rule changes 134, 135
skills 134
team cohort 135

Subject Index 194
soccer injury
  age 159
  dangerous play 159
  level of play 160
  physical maturity 160
  sex 159, 160

Rugby injury
  activity causes 128, 130
  chronometry 130
  data sources 121, 122
  epidemiological research prospects 136, 137
  incidence
    injury rates 122, 126
    player position effects 126
  location 126, 128
  onset 126
  participation levels 120, 121
  prevention suggestions 135, 136
  risk factors
    age 135
    physical characteristics 135
    rule changes 134, 135
    skills 134
    team cohort 135
  severity
    catastrophic injury 132, 133
    time loss 133
    types of injury 130, 132
  situational causes 128

Shoulder injury
  baseball pitching 13–15
  rugby 128

Soccer injury
  activity causes 152
  chronometry 153
  economic impact 141
  epidemiological research prospects 165
  incidence
    age effects 142
  participation level effects 142
  player position effects 142
  sex effects 142, 145
  location
    concussion/head injury 149
    eye injury 149
    knee injury 149
    overview 145, 147–149
    wrist injury 149, 150
  onset 145
  participation levels 140–142
  prevention suggestions
    physical capabilities 164, 165
    preseason conditioning 164
    shin guards 160, 164
  risk factors
    age 159
    dangerous play 159
    level of play 160
    physical maturity 160
    sex 159, 160
  severity
    catastrophic injury 153, 157
    clinical outcome 157, 159
    time loss 157
    types of injury 153
  situational factors
    geographic region 150
    indoor versus outdoor 150
    practice versus game 150
Spinal cord injury (SCI)
  gridiron football 69, 70, 73, 74
  ice hockey 94, 106
  rugby 132, 133
  Team sports, psychological factors and motor skills 2
  Thermoregulation, limited capacity in children 3, 4
Wrist injury, soccer 149, 150
